DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

It will be an earth fill dam with a water surface area approximately 50 yards by 75 yds. At the highest point of earth fill it will measure approximately 6 feet. There will be approximately 248 yards of supply ditch. The pump is a Century 7.5 horse power and it'll irrigate the farm and pasture through aluminum pipe that is portable and coupled together for varied irrigation spots. From the central location of the diversion dam the water will be easily distributed to the parts of the farm needing it most.

The dam is also directly behind and above our well providing the water level of our well with adequate support during times of need, providing our family with more dependable water usage.

If for domestic use state number of families to be supplied one family

7. Construction work will begin on or before Oct 1, 1979

8. Construction work will be completed on or before Oct 1, 1980

9. The water will be completely applied to the proposed use on or before Oct 1, 1980
