*APPLICATION FOR PERMIT

To Appropriate the Public Waters of the State of Oregon

I, State of Oregon, by and through the Oregon State Game Commission and	i Fish
Xòy Commission of the State of Oregon, P. O. Box 4136, Portland 8, Oregon,	·
State of Oregon , do hereby make application for a permit to appr	ropriate the
following described public waters of the State of Oregon, SUBJECT TO EXISTING RIGHTS.	:
If the applicant is a corporation, give date and place of incorporation	
1. The source of the proposed appropriation is Applegate Reservoir sterage ass	79 Z4 1 gned=
to fishery-enhancement , a tributary of Rogue River	
2. The amount of water which the applicant intends to apply to beneficial use is maximu	360 m of 1 20
cubic feet per second, but varying as outlined on attached sheet. (If water is to be used from more than one source, give quantity from each)	
**3. The use to which the water is to be applied is fish life use by improving dow (Arrigation, power, mining, manufacturing, domestic states)	nstream
environmental conditions.	
4. The point of diversion is located 1250 ft. S and 2200 ft. E from the except as directed by the appropriate flow street flow.	ie NW
except as directed by the appropriate flow stredule former of Sec. 36. All water to be released directly from the reservoir to (Section or subdivision)	the natur
Applegate River channel immediately below the dam and to remain in that che	unnel for
its length from the dam to the confluence with the Rogue River, and in the	
of the Rogue River helow that confluence to the Pacific Ocean. (# preferable, give distance and bearing to section corner)	
(If there is more than one point of diversion, each must be described. Use separate sheet if necessary)	***************************************
eing within the NW2 (Give smallest legal subdivision) of Sec36 , Tp40	S. N. or S.)
2. 4 W., W. M., in the county of Jackson.	
5. The	•••••
(Main ditch, canal or pipe line) (Miles or feet) 1 length, terminating in the	-
(Smallest legal subdivision)	N. or S.)
(E. ox W.) W. M., the proposed location being shown throughout on the accompanying	map.
DESCRIPTION OF WORKS	
6. (a) Height of dam 320 feet, length on top 1325 feet, length on	at bottom
prox. 35 feet; material to be used and character of construction earth and gravel ma	terial.
ck and brush, timber crib, etc., wasteway over or around dam)	
(b) Description of headgate Intake tower and free flow tunnel - concrete. I	low
controlled by two 5° x 7° slide gates.	
(c) If water is to be pumped give general description	
(olze and type of pump)	
(Size and type of engine or motor to be used, total head water is to be lifted, etc.)	
*A different form of application is provided where storage works are contemplated. *Application for permits to appropriate water for the generation of electricity, with the exception of municipalities, must be appropriate.	

Either of the above forms may be secured, without cost, together with instructions by addressing the State Engineer, Salem,

eaagate. At nea	dgate: width or	ı top (at water	line)	feet; width on botton

SUPPLEMENTAL SHEET to

WATER RESOURCES DEPT. SALEM, OREGON

Application 37617

2 - Quantities of storage releases to provide minimum flows in the

described sections of the Applegate River channel as follows:

Dam to mouth of Little Applegate River

50-o-f-s-from January 1-through October 31

5-24-79

Mouth of Little Applegate to mouth of Applegate River

24

120 c.f.s. from January 1 through February 28/29;

Dam to mouth of Applegate River

Natural stream flow with regulation flexibility for flood control purposes from November 1 through December 31.

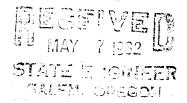

Quantities of storage releases with natural flows to provide minimum flows in the described sections of the Applegate River channel as follows:

Stream Section	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	0ct	Nov	Dec
Damsite to Little Apple- gate	100	100	170	170	170	200	230	200	(200 130)	130	100	100
Little Appledate to Williams Creek	200	200	265	265	265	265	230	200	(200 200)	240	240	200
Williams Creek to mouth	300	300	340	340	360	360	120	120	(120 120)	360	360	300

Note: Flow released from Applegate reservoir storage will be adjusted to augment natural flows per above schedule. Above schedule may be modified in the future to maximize fishery benefits from Applegate Project through streamflow enhancement.

	under development.
	marks: This project is to to developed by the United States Army Corps of The project was authorized by
Congre	sers through its Rogue River Basin program. The report as submitted to the ss in 1962 and revised in 1965. Under the revised plan, the project provides
fisher	y benefits from the controlled release of up to 360 cubic feet per second of
water	of from Applegate Reservoir being assigned to fisheries interest and from the to increase stream flows and reduce water temperatures downstream. In the
event	olled release of up to 120 oubto feet per second of mater to provide higher of shortages, releases from available storage in the reservoir will be
anvern	m flows with lower water temperatures. The development is contingent uponed by regulations set forth in authorizing legislation. Additionally,
800030	niate author by Congress to provide funds for construction and to authorize e provided for other project purposes can be utilized to support downstream
