6.

#### DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

This application is for a spring which has already been developed and in use for an unknown span of time; perhaps over 50 years. The spring flows into a sub-surface brick cistern in which a submersible pump puts water to a domicile approximately 1600 feet directly west of the spring. The pump house next to the cistern used to house a piston type pump, but now serves only as an electrical relay center to the submersible pump which is placed directly into the cistern. The exact size and location of the pipeline are not known. The location of pipeline shown on the maps is based on logic only.
