CURIS

4. The amount of water which the applicant intends to apply to beneficial use is ..... 39.5

cubic feet per second.....  
(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is ..... IRRIGATION (Supplemental)

6. DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

4. The amount of water which the applicant intends to apply to beneficial use is ..... 39.5

cubic feet per second.....  
(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is ..... Supplemental Irrigation

6. DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

The main creek diversion consists of a 4' conc. structure across creek channel diverting water into the main canal. The head gate consists of 2-4'x7' metal gates enclosed in a concrete frame. The main supply canal is approximately 25' wide top - 12' bottom and 6' deep. This canal is about 3 miles in length to where it feeds water into laterals for distribution. Diversions to laterals consist of screw gates in culvert pipes of various sizes depending upon length of runs. The canals and drains shown on map are utilized in both supply and drainage categories.

The large pump is located in the Canal Drain and serves to redistribute waters that drain off lands to the north, return flow drainage from lands to the south and serves to also divert the canal waters to the south. The smaller drainage pump picks up drainage on the opposite side of supply canal and gets it into the distribution system. The irrigation system consists of flood irrigation controlled by checks and levees. Tail water is picked up in drains and returned to the pump for redistribution.

If for domestic use state number of families to be supplied.....

7. Construction work will begin on or before..... Completed

8. Construction work will be completed on or before..... Completed

9. The water will be completely applied to the proposed use on or before.....

### Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 39.5 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from Deep Creek.

The use to which this water is to be applied is supplemental irrigation.

If for irrigation, this appropriation shall be limited to 1/40th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year, provided further that the right allowed shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein, and is subject to the terms and provisions of a stipulation dated December 2, 1978, and recorded at Volume 6, page 588, Miscellaneous Records of the Water Resources Director and by reference made a part of this permit,

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is April 15, 1977

Actual construction work shall begin on or before August 31, 1980 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1981

Complete application of the water to the proposed use shall be made on or before October 1, 1982

WITNESS my hand this 31st day of August, 1979

James E. Sisson  
Water Resources Director
