4. The amount of water which the applicant intends to apply to beneficial use is
cubic feet per second..... drawn on a periodic basis
(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is road dust abatement and ~~fire control~~
23 cfs Road Use

6. DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

A minimum of disturbance will be necessary. A small access trail will be cleared for pumper units to reach the stream to fill their tanks, through use of gasoline powered water pumps.

No environmental or aesthetic damage to the stream will occur. Use of water is anticipated only on a periodic basis.

The pumps used for loading of tank trucks are standard pacific marine pumps. Approximately 2 to 4,5,000 gallon tank loads would be loaded 10 to 15 days per year on an intermittant basis.

No water system for fire control will be installed. Water would be removed only as needed through small pumper units.

If for domestic use state number of families to be supplied.....

7. Construction work will begin on or before..... September 1979

8. Construction work will be completed on or before..... September 1979

9. The water will be completely applied to the proposed use on or before.....

Application No. 58914

Permit No. 44474

Remarks: The water use will occur on the average of 3 years out of 10, or less, and would not be sufficient quantity to impair downstream users or reduce to quality of the stream.
