of pasture

6.

DESCRIPTION OF WORKS See attached letter

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

At point of diversion I wish to install a 35-40 h.p. pump. An 8" main line will traverse the length of the fields that I wish to have in alfalfa. ~~2.5~~
~~1/4 mile~~ lines will run north & south on this field west the addition of pack line for the area to of the pond and a big gun for the area north of road ~~and 1/4 of trees~~.
The ~~2.5~~ acres of pasture is to the east of the alfalfa field & will be irrigated with pack ~~line~~. My real need for water from the W. River comes from the fact that I can bring three phase power across the river to point of diversion. It is the only way that I can economically bring 3 phase power to my ~~farm~~ ~~because~~ are applying for a F.I.B. loan for development & they ~~agree~~ it to be irrigated from the river.

If for domestic use state number of families to be supplied

7. Construction work will begin on or before Aug 1/80

8. Construction work will be completed on or before Aug 1/81

9. The water will be completely applied to the proposed use on or before Aug 1/81
