

* Permit No. 4521

CERTIFICATE NO. 3506

APPLICATION FOR A PERMIT

To Appropriate the Public Waters of the State of Oregon

I, J F Hillman (Name of Applicant) of The Dalles (Postoffice) Ore., County of Wasco State of Ore., do hereby make application for a permit to appropriate the following described public waters of the State of Oregon subject to existing rights:

If the applicant is a corporation, give date and place of incorporation

1. The source of the proposed appropriation is Two Springs (Name of stream)

tributary of Eight Mile Creek

2. The amount of water which the applicant intends to apply to beneficial use is 1/4 cubic feet, per second.

3. The use to which the water is to be applied is Irrigation, being a supplemental supply for the irrigation of land already having a partial water right, and domestic in- domestic supplies, etc.) cluding stock water

4. The point of diversion is located are Spring No. 1 situated 14.60 chs. east & 960 chs. S of 1/4 cor. in West boundary Sec. 28 T 1 N R 14 E. W.M. Spring No. 2 situated 1975 chs. East & 6.30 chs. South of same corner.

being within the NW 1/4 of SW 1/4 of Sec. 28, Tp. 1 N R. 14 E, W. M., in the county of Wasco (No. N. or S.)

5. The ditch to be 1/2 miles in length, terminating in the NE 1/4 NW 1/4 of Sec. 28, Tp. 1 N R. 14 E, W. M., the proposed location being shown throughout on the accompanying map.

6. The name of the ditch, canal or other works is Waterman Ditch & House & Barn Water System as shown by attached affidavit.

DESCRIPTION OF WORKS

DIVERSION WORKS—

7. (a) Height of dam feet, length on top feet, length at bottom feet; material to be used and character of construction (Loose rock, concrete, masonry, rock and brush, timber crib, etc., wasteway over or around dam)

(b) Description of headgate (Timber, concrete, etc., number and size of openings)

* A different form of application is provided where storage works are contemplated. These forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

CANAL SYSTEM—

8. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: Width on top (at water line) 2 feet; width on bottom 1 1/2 feet; depth of water 1 feet; grade 3 feet fall per one thousand feet.

(b) At _____ miles from headgate. Width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

FILL IN THE FOLLOWING INFORMATION WHERE THE WATER IS USED FOR:

IRRIGATION—

9. The land to be irrigated has a total area of 8.04 acres, located in each smallest legal subdivision, as follows:

(Give area of land in each smallest legal subdivision which you intend to irrigate.)
NW 1/4 SW 1/4 Sec. 28 4.57 ac.
NE 1/4 SW 1/4 " 28 3.47 ac.

And House & Barn as hereto elsewhere shown.

(If more space required, attach separate sheet)

POWER, MINING, MANUFACTURING, OR TRANSPORTATION PURPOSES—

10. (a) Total amount of power to be developed _____ theoretical horsepower.

(b) Total fall to be utilized _____ feet. (Head)

(c) The nature of the works by means of which the power is to be developed _____

(d) Such works to be located in _____ of Sec. _____ (Legal subdivision)

Tp. _____, R. _____, W. M. (No. N. or S.) (No. E. or W.)

(e) Is water to be returned to any stream? _____ (Yes or No)

(f) If so, name stream and locate point of return _____

_____, Sec. _____, Tp. _____, R. _____, W. M. (No. N. or S.) (No. E. or W.)

(g) The use to which power is to be applied is _____

(h) The nature of the mines to be served _____

STATE OF OREGON)
County of Wasco.) ss.

I, J F Hillman, being duly sworn, say: That the main purpose of this permit is to secure water right to use in house, barn and irrigation of lawn and for watering stock, the house and barn being shown by enclosures on the map, and the springs, two in number, being shown by a circle on the map, and being designated as springs "1" and "2".

The rights hereby asked for as to irrigation are covered by an old use, diversion and approp-
pending
riation, which I have made application to protect under the present/adjudication of Fifteen Mile Creek and its tributaries, Eight Mile Creek being a tributary of Fifteen Mile Creek.

I have outlined in the application filed in the adjudication proceedings the use of the water from the springs for irrigating, for stock and domestic use, but in later years, additional use is being made, which is in form a change of use, as well as an additional use.

A reservoir is shown on the map, and at present I am using the water in the manner follow-
ing: I pump same from spring number 2 to a reservoir about 300 feet from the Spring Number 2, and the fall from the reservoir to the house and barn is 110 feet elevation. The size of the reser-
voir is 3000 gallons capacity and is built of concrete, the top of which is concrete and is level with the surface of the earth, the reservoir being dug into the ground. Pipe lines extend from the reservoir to the house and barn, which supply water to the house as domestic use, and to the barn for the use of stock, being about 100 or more head of live stock, at the present time, and for watering the lawn around the house, but prior to the building of the house and making of the
same
lawn, this/place was irrigated under the old right to which I have made claim under the adjudica-
tion proceedings, and some of the water used in said irrigation was taken from these two springs.

After I have used all I desire from these two springs for irrigation of lawn, domestic use at the house and for watering the stock, there is considerable water that flows into the Waterman Ditch in irrigating season as shown upon the map, and used for irrigation of the lands shown upon the map for general crop purposes, such as hay, garden and other farm produce, to which I have made claims under the adjudication proceedings, as my predecessors and I have long used this water for that purpose.

The waters flowing from the small spring number 1 are to be diverted into Spring Number 2. The pump is situated so as to force the water from Spring Number 2, thereby utilizing the water from both springs. The size and kind of pump I am using is Myers Bulldozer type, 2200 gallons per hour capacity, operated by six-horse power gasoline engine.

The chief purpose of this application for a permit is to prove and establish my rights to the water system for the lawn, house and stock used, as shown by the map and this affidavit, which shall consist of the right to use the water of the springs by said pumping system, reservoir and water systems as now flows from the reservoir by pipes to the house and barn and water place

near the barn, as the old rights to the irrigation on the Waterman Ditch are protected by prior appropriation, diversion and use, for which application has been made in the adjudication proceedings.

The average flow of Spring Number 1 is about 900 gallons per hour, and the average flow of Spring Number 2 is about 2000 gallons per hour. It is very hard to estimate precisely how much water is now being used for the house, barn and domestic use and watering of the lawn and stock but applicant desires a permit to use sufficient for all such use, and desires it to cover any increased use that may be caused by increase in the family or number of livestock that might be brought upon the place, or desired to be watered.

J H Hillman

J F Hillman.

Subscribed and sworn to before me this 13 day of February, 1920

Frank G Dick,

Notary Public for Oregon.
My commission expires May 2, 1923.

MUNICIPAL SUPPLY—

11. To supply the city of _____
_____ County, having a present population of _____, and an
(Name of) _____
estimated population of _____ in 19_____.

(Answer questions 12, 13, 14 and 15 in all cases)

- 12. Estimated cost of proposed works, \$.....
- 13. Construction work will begin on or before
- 14. Construction work will be completed on or before
- 15. The water will be completely applied to the proposed use on or before

Duplicate maps of the proposed ditch or other works, prepared in accordance with the rules of the State Water Board, accompany this application.

STATE OF OREGON, } ss. County of Marion, }

This is to certify that I have examined the foregoing application and do hereby grant the same, subject to the following limitations and conditions: If for irrigation, this appropriation shall be limited to one-eightieth of one cubic foot per second, or its equivalent, for each acre irrigated, and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The right to the use of water herein granted is limited to a supplemental supply for the irrigation of lands already having a partial water right, and for domestic use including stock water.

The amount of water appropriated shall be limited to the amount which can be applied to beneficial use and not to exceed 0.21 cubic feet per second, or its equivalent in case of rotation. The priority date of this permit is March 9, 1920

Actual construction work shall begin on or before April 20, 1921 and shall thereafter be prosecuted with reasonable diligence and be completed on or before June 1, 1922

Complete application of the water to the proposed use shall be made on or before October 1, 1923

WITNESS my hand this 20th day of April, 1920 Percy A Cupper State Engineer.

Permits for power development are subject to the limitation of franchise as provided in Section 6633, Lord's Oregon Laws, and the payment of annual fees as provided in Chapter 213, Session Laws of 1915.
