

4. The amount of water which the applicant intends to apply to beneficial use is ..... 0.3  
cubic feet per second.....  
(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is ..... Irrigation

6.

#### DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

There is no diversion dam or headgate as water is simply drawn from the creek thru a 2½" plastic pipe. Water is pumped from a centrifugal pump with ½ hp elec. motor and supply is distributed thru 2" black plastic pipe buried. Pipeline extends from pump (at creekside) to the road at northern boundary of property with 6 main 2" stands for connection to sprinkler pipes. In addition there are several small laterals of ¾" dia serving the garden & house areas. Pressure is adequate to run 6-8 #15 Rainbirds at the upper end.

If for domestic use state number of families to be supplied .....

7. Construction work will begin on or before ..... completed
8. Construction work will be completed on or before ..... completed
9. The water will be completely applied to the proposed use on or before ..... completed

Remarks:.....

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.
