550

4. The amount of water which the applicant intends to apply to beneficial use is 14.02

cubic feet per second.....

(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is Irrigation and Supplemental Irrigation

6.

DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

X The water is to be pumped through the Columbia Improvement District pump and canal distribution system. Water will be taken from the canal with a 24 inch slide-gate headgate, through a 20 inch pipe, then into the pumping station. The station is a 8ft X 20ft X 8ft steel tank with a 75 hp. turbine pump mounted in the tank. A pipeline of 10 inch PVC will extend to a manifold that is included in the existing system. The system includes an underground network of 8 inch and 10 inch steel pipelines, two existing wells, and 3 center pivots of 1250 feet and 5 center pivots of 600 feet.

If for domestic use state number of families to be supplied.....

7. Construction work will begin on or before..... Completed

8. Construction work will be completed on or before..... Completed

9. The water will be completely applied to the proposed use on or before..... Upon Approval

Application No. 61230

Permit No. 45563

42200

Remarks: This application is accompanied by two applications for transfer to correctly locate present use of Ground Water and to correspond with this application.

I would hope that the application in question would be acted upon quickly. It will be necessary to place the headgate in the canal prior to Columbia Improvement District filling the canal. It is also mandatory to obtain this surface water permit before financing can be completed.

Application No. 61230

Permit No. 45563

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 13.9 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from Columbia River

The use to which this water is to be applied is irrigation and supplemental irrigation

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 4 1/2 acre-feet per acre for each acre irrigated during the irrigation season of each year, provided further that although declared herein to be for supplemental irrigation in part the right allowed may, in the interest of conserving the ground water supplies, be exercised at times when water is available in the ground water supply provided that the total quantity diverted from all sources of supply does not exceed the limitation allowed herein.

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is February 5, 1981

Actual construction work shall begin on or before March 24, 1982 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1982

Complete application of the water to the proposed use shall be made on or before October 1, 1983

WITNESS my hand this 24th day of March, 1981
