Application No.61355.....

Permit No.45673.....

Remarks: This is a reapplication for irrigation rights in our center field. Due to a number of circumstances we were not able to keep the rights current in that field. Now we have a new line buried in the field and would have had water applied last fall but then we had drought conditions. We are now in a position to keep them current. No claim to use the waters as described by permits 36996, 36937, and 36988 will be made on the lands described by the application. We will be using the permits as we have the past several years, on the south side of fifteen-mile creek.

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.
