Application No. 62964

Permit No. 46049

46049

Remarks: This new water right is needed to replace an inadequate supply in regard to quality. The location of the intake is in solid rock which will allow the infiltration gallery construction. Construction of a dam on Hester Creek to provide a suitable intake system is not feasible due to lack of land ownership and the small drainage basin with heavy forest management uses.

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.
