When in the judgement of the Watermaster it becomes necessary to measure and keep a record of the amount of water being diverted, the right allowed herein shall be subject to the installation and maintenance of an in-line flow meter, a weir, or other suitable device for measuring the water.

The use of water under this permit is contingent upon continuing compliance with the conditions of any required discharge permit for water quality control held by the water right permittee.

This development was reviewed and considered by the Water Resources Commission on May 13, 1988.

Actual construction work shall begin on or before June 23, 1990, and shall be completed on or before October 1, 1991. Complete application of the water to the use shall be made on or before October 1, 1992. *

This permit is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

The right is subject to minimum flows established by the Water Resources Commission with an effective date prior to this right.

Issued this date, June 23, 1989.
