STATE OF OREGON

COUNTY OF TILLAMOOK

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

OREGON DEPARTMENT OF FISH AND WILDLIFE 506 SW MILL STREET PO BOX 59 PORTLAND, OREGON 97207

503-229-5695

to use the waters of SOUTH FORK WILSON RIVER, a tributary of WILSON RIVER, for FISH REARING.

This Permit is issued approving Application 69639. The date of priority is NOVEMBER 13, 1989. The use is limited to not more than 3.0 CUBIC FEET PER SECOND, or its equivalent in case of rotation, measured at the point of diversion from the source.

The points of diversion are located as follows:

NW 1/4 NW 1/4, NE 1/4 NW 1/4, SECTION 8, T 1 N, R 6 W, W.M.; 732 FEET SOUTH AND 60 FEET EAST; 880 FEET SOUTH AND 1700 FEET EAST, BOTH FROM NW CORNER, SECTION 8.

The project diversion weir will be operated to continuously maintain at least 7.0 cubic feet per second of flow in the natural channel of South Fork Wilson River between the diversion weir and the point of project return flows to the South Fork Wilson River at the mouth of Tuffy Creek. The diversion weir shall be designed to release 7.0 CFS downstream ahead of any diversion into the rearing pond.

Upstream passage for anadromous and resident fish will be provided at all times. The South Fork Wilson River diversion weir includes a fishway constructed to Oregon Department of Fish and Wildlife (ODFW) criteria for adult salmon, steelhead, and cutthroat trout. The fishway will be operated to meet those criteria whenever diversion weir flashboards are in place during the period March through August. During September through February, diversion weir flashboards will be removed to provide unobstructed upstream fish passage in the South Fork Wilson River.

Downstream migrating salmon and steelhead will be excluded from project intakes by fish screens designed to meet ODFW criteria for protection of salmon, steelhead, and cutthroat trout. The screens will be emplaced to meet those criteria and will be maintained free of debris whenever water is diverted out of the South Fork Wilson River at either the diversion weir or the auxiliary pumping station.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under the Permit is as follows:

NE 1/4 NE 1/4 SECTION 7 TOWNSHIP 1 NORTH, RANGE 6 WEST, W.M.

Actual construction work shall begin on or before JANUARY 30, 1991, and shall be completed on or before October 1, 1991. Complete application of the water to the use shall be made on or before October 1, 1992.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to restrictions on the use, civil penalties, or cancellation of the permit.

"CERTIFICATE NO. ____669]__"

Application 69639 Water Reso

Water Resources Department

PERMIT 50858

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

Issued this date, JANUARY 30, 1990.
