SECTION 12  
TOWNSHIP 30 SOUTH, RANGE 15 WEST, W.M.

Application S-73023 Water Resources Department

PERMIT 53001

## Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, a totalizing flow meter or other suitable measuring device(s) as approved by the watermaster must be installed at each diversion point. The totalizing flow meter must be installed and maintained as identified in OAR 690-507-645. The permittee shall keep a complete record of the amount of water used each month. The permittee shall submit a report which includes the recorded water use measurements to the Department at its request. The permittee may be required to report annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

Diversion and use of water under this permit must comply with the Clean Water Act and utilize best management practices as identified in the plan developed as specified in the New River Alternative Dispute Resolution Team Agreement on file with the Department.

**STANDARD CONDITIONS**

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction work shall begin within one year from permit issuance and shall be completed on or before October 1, 1999. Complete application of the water to the use shall be made on or before October 1, 2000.

Issued January 31, 1997

  
Martha O. Pagel, Director  
Water Resources Department
