

STATE OF OREGON  
COUNTY OF DOUGLAS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO:

ANDREW BOBILLOT  
3937 GLENBROOK LOOP  
RIDDLE OR 97469

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-86624

SOURCE OF WATER: GALESVILLE RESERVOIR, PERMIT R-9964, A TRIBUTARY OF COW CREEK

PURPOSE OR USE: IRRIGATION OF 5.0 ACRES

MAXIMUM VOLUME: 11.15 ACRE FEET

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31, OR AS FURTHER LIMITED BY CONTRACT

DATE OF PRIORITY: JUNE 21, 2006

	Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
Point of Diversion	31 S	4 W	WM	28	SW NE	2390 SOUTH AND 2290 WEST FROM NE CORNER, SECTION 28
Point of Re-diversion	30 S	6 W	WM	33	NW NE	750 FEET SOUTH AND 380 FEET EAST FROM THE N1/4 CORNER, SECTION 33

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-SEVENTIETH of one cubic foot per second and 2.23 acre-feet for each acre irrigated during the irrigation season of each year.

**Authorized Place of Use:**

Twp	Rng	Mer	Sec	Q-Q	Acres
30 S	6 W	WM	33	NW NE	1.00
30 S	6 W	WM	33	SW NE	4.00

**Measurement, recording and reporting conditions:**

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at the point of re-diversion as approved by the Director. The totalizing flow meter must be installed and maintained as identified in OAR 690-507-645. The permittee shall maintain the meter(s) in good working order.
- B. The permittee shall allow the watermaster access to the meter; where the meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used, and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water-use

information, the periods of water use, and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

The water user shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion, while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of water. The water user may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

The use of water under this right is subject to the terms and conditions of contract No. I-2006-5, or a satisfactory replacement, between Douglas County and the applicant, a copy of which is on file in the records of the Water Resources Department.

### STANDARD CONDITIONS

1. Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.
2. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.
3. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
4. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
5. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.
6. Complete application of the water to the use shall be made on or before October 1, 2011. If the water is not completely applied before this date, and the water user wishes to continue development under the permit, the water user must submit an application for extension of time, which may be approved based upon the merit of the application.
7. Within one year after complete application of water to the proposed use, the water user shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued JANUARY 4, 2007.

 for

Phillip C. Ward, Director  
Water Resources Department
