

STATE OF OREGON  
COUNTY OF DOUGLAS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO:

ADALINE WILBORN  
PO BOX 105  
RIDDLE OR 97469

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-86921

SOURCE OF WATER: GALESVILLE RESERVOIR, CONSTRUCTED UNDER PERMIT R-9964, A TRIBUTARY OF COW CREEK

PURPOSE OR USE: IRRIGATION ON 1.5 ACRES

MAXIMUM VOLUME: 3.34 ACRE FEET

DATE OF PRIORITY: JUNE 26, 2007

PERIOD OF USE: APRIL 1 THROUGH OCTOBER 1

	Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
Point of Diversion	31 S	4 W	WM	28	SW NE	2390 FEET SOUTH AND 2290 FEET WEST FROM NE CORNER, SECTION 28
Point of Re-diversion	30 S	6 W	WM	24	SW NE	600 FEET NORTH AND 675 FEET EAST FROM C1/4 CORNER, SECTION 24

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to a diversion of not to exceed 2.23 acre-feet per acre for each acre irrigated during the irrigation season of each year. The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

**Authorized Place of Use:**

Twp	Rng	Mer	Sec	Q-Q	Acres
30 S	6 W	WM	24	SW NE	1.50

**Measurement, recording and reporting conditions:**

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of re-diversion. The totalizing flow meter must be installed and maintained in good working order.
- B. The permittee shall allow the watermaster access to the meter; where the meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used, and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water-use information, the periods of water use, and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

The water user shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion, while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of water. The water user may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

The use of water under this right is subject to the terms and conditions of contract No. I-2007-12, or a satisfactory replacement, between Douglas County, a political subdivision of the State of Oregon (County) and the applicant, a copy of which is on file in the records of the Water Resources Department.

### STANDARD CONDITIONS

1. Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.
2. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.
3. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
4. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
5. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.
6. Complete application of the water to the use shall be made on or before October 1, 2012. If the water is not completely applied before this date, and the water user wishes to continue development under the permit, the water user must submit an application for extension of time, which may be approved based upon the merit of the application.
7. Within one year after complete application of water to the proposed use, the water user shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).
8. This permit does not allow unauthorized inundation of property not under the ownership of the permit holder.

Issued January 10, 2008

E. Timothy Wall  
for Phillip C. Ward, Director  
Water Resources Department
