

STATE OF OREGON

COUNTY OF Benton

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

GREENBERRY IRRIGATION DISTRICT  
30742 VENELL PLACE  
CORVALLIS, OR 97333

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-87035

SOURCE OF WATER: WILLAMETTE RIVER, A TRIBUTARY OF COLUMBIA RIVER

PURPOSE OR USE: SUPPLEMENTAL IRRIGATION UP TO 6300.0 ACRES PER IRRIGATION SEASON LOCATED WITHIN AN AREA OF 10988.9 ACRES

MAXIMUM RATE: 50.0 CUBIC FEET PER SECOND (CFS)

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: DECEMBER 7, 2007

Points of Diversion:

POD #1 - SWSW, SECTION 25, T13S, R5W, W.M.; 1300 FEET NORTH AND 1300 FEET EAST FROM SW CORNER, SECTION 25

POD #2 - SWNW, SECTION 19, T13S, R4W, W.M.; 3146 FEET NORTH AND 1281 FEET EAST FROM SW CORNER, SECTION 19

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

 SECTION 35

TOWNSHIP 13 SOUTH, RANGE 5 WEST,

1. Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter(s) in good working order. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter(s); provided however, where any meter is located

within a private structure, the watermaster shall request access upon reasonable notice.

2. The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.
3. Use of water under this water right is allowed only when flows in the mainstem Willamette River are met or exceeded based the flows as identified in Table 1 below. Flows must be met at Albany (USGS ID# 1417000) except during the out-migration period of April, May, and June when minimum flows shall be met at both Salem (USGS ID# 1419100) and Albany before withdrawal is allowed.

Table 1

<b>Date</b>	<b>Minimum Bypass Flows in CFS for USGS Gauge Location, Willamette River at: Salem</b>	<b>Minimum Bypass Flows in CFS for USGS Gauge Location, Willamette River at: Albany</b>

August 1-31	5630	3980
September 1-30	5630	3980
October 1-14	5630	3980
October 15-31	5630	4160

4. There is a base map for this permit that covers 10991.8 acres. Each year, no later than April 30 or prior to appropriation of water, whichever comes first, the permittee shall submit a map to

the Department that demarcates the place of use under this water right and the place of use of underlying primary water rights. The place of use shall be within the 10988.9 acres shown on the base map, and shall not exceed 6300.0 acres annually.

The annual map shall also show the place of use for irrigation water rights within Greenberry Irrigation District that are Greenberry Irrigation District water rights, as well as non-Greenberry Irrigation District water rights.

5. Water use under this permit is not allowed if there are not contract(s) for stored water in place for the same lands identified for use under the annual map unless the applicant has a valid request for a stored water contract(s) before the Bureau of Reclamation and is pursuing the issuance of the contract in good faith.
6. The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows. If standards are not met, mitigative measures, such as riparian restoration along stream corridors, may be required by the Department to offset the impacts of the withdrawal on water quality. The applicant is encouraged to pursue riparian restoration and water conservation practices on an ongoing non-regulatory basis.

#### **STANDARD CONDITIONS**

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Issued August 27, 2009
