

STATE OF OREGON

COUNTY OF COOS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

RON LA FRANCHI  
580 N. CENTRAL  
COQUILLE, OR 97423

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-87592

SOURCE OF WATER: A SPRING (POD 1) AND A SPRING (POD 2), TRIBUTARIES OF MILL CREEK, AND MILL CREEK (POD 3), A TRIBUTARY OF MIDDLE FORK COQUILLE RIVER

PURPOSE OR USE: HUMAN CONSUMPTION (INDOOR USE ONLY: COOKING, DRINKING, AND SANITATION) FOR ONE HOUSEHOLD

MAXIMUM RATE: 0.005 CUBIC FOOT PER SECOND, FURTHER LIMITED TO 500 GALLONS PER DAY

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: MARCH 16, 2010

POINTS OF DIVERSION LOCATIONS:

POD 1 (SPRING) -NW ¼ NE ¼, SECTION 23, T29S, R12W, W.M.; 330 FEET SOUTH AND 400 FEET EAST FROM N1/4 CORNER, SECTION 23

POD 2 (SPRING) - NW ¼ NE ¼, SECTION 23, T29S, R12W, W.M.; 770 FEET SOUTH AND 240 FEET EAST FROM N1/4 CORNER, SECTION 23

POD 3 (MILL CREEK) - NW ¼ NE ¼, SECTION 23, T29S, R12W, W.M.; 720 FEET SOUTH AND 140 FEET EAST FROM N1/4 CORNER, SECTION 23

POINT OF RE-DIVERSION LOCATION AT LA FRANCHI LATERAL:

SW ¼ SE ¼, SECTION 22, T29S, R12W, W.M.; 980 FEET SOUTH AND 1580 FEET WEST FROM E1/4 CORNER, SECTION 22

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SW ¼ SE ¼  
SECTION 22  
TOWNSHIP 29 SOUTH, RANGE 12 WEST, W.M.

## Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at the re-diversion point. The permittee shall maintain the meter in good working order.
- B. The permittee shall keep a complete record of the amount of water diverted each month, and shall submit a report which includes the recorded report water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- C. The permittee shall allow the watermaster access to the meter; provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The permittee shall install, maintain, and operate screening devices at the three points of diversion to protect aquatic wildlife from entering the proposed diversion. The screen mesh hole diameter shall not exceed 3/32".

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

**STANDARD CONDITIONS**

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows, except where those instream water rights allow for the use authorized herein.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Issued **October 20**, 2011
