

STATE OF OREGON

COUNTIES OF YAMHILL AND POLK

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

GRAND RONDE COMMUNITY WATER ASSOCIATION  
PO BOX 253  
GRAND RONDE, OR 97347

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-87207

SOURCE OF WATER: THREE UNNAMED SPRINGS, TRIBUTARIES TO ROCK CREEK

PURPOSE OR USE: QUASI-MUNICIPAL USE

MAXIMUM RATE: 0.29 CUBIC FOOT PER SECOND. FURTHER LIMITED TO NO MORE THAN 69 ACRE-FEET IN ANY ONE PERIOD OF USE.

PERIOD OF USE: JUNE 1 THROUGH SEPTEMBER 30

DATE OF PRIORITY: JUNE 25, 2008

POINT OF DIVERSION (POD) LOCATIONS:

POD A: SW ¼ SW ¼, SECTION 33, T6S, R8W, W.M.; 960 FEET NORTH AND 945 FEET EAST FROM SW CORNER, SECTION 33

POD B: SE ¼ SW ¼, SECTION 33, T6S, R8W, W.M.; 1030 FEET NORTH AND 1420 FEET EAST FROM SW CORNER, SECTION 33

POD C: NW ¼ SW ¼, SECTION 33, T6S, R8W, W.M.; 1375 FEET NORTH AND 1115 FEET EAST FROM SW CORNER, SECTION 33

THE PLACE OF USE IS LOCATED AS FOLLOWS:

Section 31  
Section 32  
**T5S, R6W, WM**

Section 28  
Section 30  
Section 31  
Section 32

**Note: Place of Use does not include area within the City of Willamina UGB.**

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter in good working order.
- B. The permittee shall keep a complete record of the amount of water diverted each month, and shall submit a report which includes the recorded report water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- C. The permittee shall allow the watermaster access to the meter; provided however, where

any meter is located within a private structure, the watermaster shall request access upon reasonable notice.

- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

Mitigation water from Transfer T-10247, or a satisfactory replacement, must be legally protected instream for the life of the permit and subsequent certificate(s). Regulation of the use and/or cancellation of the permit, or subsequent certificate(s) will occur if the required mitigation is not maintained.

Water may be diverted only when Department of Environmental Quality sediment standards are being met.

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

Notwithstanding that Oregon Department of Fish and Wildlife has made a determination that fish screens and/or by-pass devices are not necessary at the time of permit issuance, the permittee may be required in the future to install, maintain, and operate fish screening and/or by-pass devices to prevent fish from entering the proposed diversion, and to provide adequate upstream and downstream passage for fish.

### STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

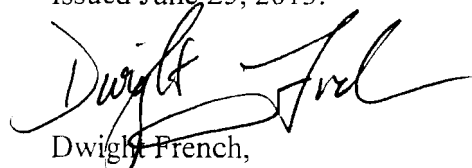

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Issued June 25, 2013.
