

STATE OF OREGON

COUNTY OF JACKSON

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO:

CITY OF JACKSONVILLE
PO BOX 7
JACKSONVILLE OR 97530

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-88088

SOURCE OF WATER: LOST CREEK RESERVOIR, CONSTRUCTED UNDER PERMITS R-8141 AND R-8142, TRIBUTARY TO ROGUE RIVER

PURPOSE OR USE: MUNICIPAL USES

MAXIMUM VOLUME: 200.0 ACRE FEET (OR AS FURTHER LIMITED BY AGREEMENT)

DATE OF PRIORITY: MAY 21, 2015

PERIOD OF USE: MAY 1 THROUGH SEPTEMBER 30

Authorized Point of Re-Diversion:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
36 S	2 W	WM	13	SW NW	SOUTH 25 DEGREES 25 MINUTES 28 SECONDS EAST, 4386 FEET FROM NE CORNER DLC 42

Authorized Place of Use: CITY OF JACKSONVILLE SERVICE AREA

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of re-diversion, and maintain the meter(s) in good working order.
- B. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- C. The permittee shall allow the watermaster access to the meter; where a meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

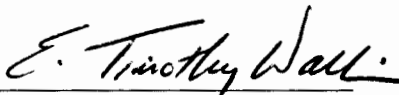

The use of water under this right is subject to the terms and conditions of the agreement between The Department of the Army and the permittee, a copy of which must be on file in the records of the Water Resources Department.

The water user shall install, maintain, and operate fish screening and fish passage devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion, while passage devices provide adequate upstream and downstream passage for fish. The required screen and passage devices are to be in place and functional, and approved in writing by ODFW prior to diversion of water. The water user may submit evidence in writing that ODFW has determined screens and/or passage devices are not necessary.

STANDARD CONDITIONS

1. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.
2. Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.
3. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
4. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
5. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.
6. If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR Chapter 635, Division 415, shall be followed.
7. Completion of construction and application of the water shall be made within 20 years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.
8. Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Issued NOVEMBER 19 2015

E. Timothy Wallin, Water Rights Program Manager
for Thomas M. Byler, Director
