It is further limited to a diversion of not to exceed 1.5 acre-feet per acre irrigated during the period from November 2 to the end of February, provided the use of water shall not exceed 4.5 acre-feet for each acre irrigated in any one year. The quantity of water allowed herein, together with any other existing right from this point of diversion shall not exceed the current capacity of the diversion system.

The measuring and recording devices shall be located:

- a. At the proposed additional point of diversion from the Columbia River, and,
- b. At the point where Columbia River water under this permit enters the permit holder's farm water delivery system.

The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice

Water shall be acquired from the same surface water source as the original point of diversion.

Diversion screening facilities shall be designed, installed, and operated to Oregon Department of Fish and Wildlife specifications.
