Remarks: In the matter of the Application	
for The Latourette Project, No. 9643.	
This is to certify that I have carefully measured the water flow in T	oner
Creek at the point where the power plant of Mr. Latourette is to be installed on	
said Creek, and find that at the present low stage of water there is but 1 1/8	
inches to the second flowing in said stream. I also estimate that at the ordina	•
stage of water there will be not to exceed 1 cubic foot per second in said stre	
and that the fall between the point where the water is to be taken from said cre to the point of the power plant will be 35 feet.	ek
