Remarks: The combined flow of the entire five small streams indicated on the map perhaps will not reach 2000 gallons per day during the dry season . At present only the one stream is used as indicated on the map. The plan is to bring in the others as they may be needed. With the opening of the Roosevelt Highway and the development of an auto camp and park, it is estimated that the combined flow of these small streams will be required to supply the need for domestic purposes, for service station and for sprinkling. Application is hereby made for the use of all of them up to 1/100 \_\_\_\_\_ second feet.
