Remarks: The water pumped from Johnson Creek is to be used for irrigating lawn, shrubbery, rose bushes and a small truck garden for home use only and in case of a grass or brush fire starting in or near my property. This water is to be pumped only during the dry season, so I will not have to use Bull Run Water when the City of Portland forbids us to use the same during any shortage. The reason Questions 13 and 14 are answered finished is because I installed this last August, not knowing that I had to make application to the State Engineer for use of water which flowed through my property.
