Remarks: Along the northern boundary of Lot 7 is a small hill, as shown on accompanying plats, near the foot of which are springs that flow into and make a small stream with banks not well defined. It is applicant's plan to run a ditch along near the foot of said hill, catch the water, run it westerly so as to cover land most advantageously, and then distribute the water by means of small ditches shown in red on the plats. The land to be irrigated is also shown in red. The "works" are, therefore, very simple, consisting only of ditches, and there will be no dam, diversion works, etc.
