Remarks: Note - It is proposed to take in this spring water and use it as it is a little better water than the Squaw Creek water. This water will be run down and dumped into the head of the pipe where it now diverts the water from Squaw Cree. Then if that is enough water no water will be diverted from Squaw Creek unless the spring does not supply enough and then the water from Squaw Creek will be diverted as always.

~~At certain season of the year this water flows into Squaw Creek but if the creek is dry it sinks before flowing more than 200 ft. and so no one would get the benefit of it unless we use it.~~
