Remarks:

Water is diverted from Klamath River through a dredged canal approxi-
mately 28 ft. in length and then pumped through 1,000 ft. of 16" wood stave
pipe. The lift is about 33 ft. From the discharge point a gravity canal
extends north-easterly and also southwesterly. A second pumping station is
proposed in the SW¹/₄SE¹/₄ of Sec. 22 to lift the water approximately 30 ft. higher
than it is lifted by the first pump.
