As per your recommendation we have made two applications. This one for
 Remarks: the water arising from Tamarak Spring and Gulch. Any deficiency of this
 ditch will be supplied from the Tamarak Creek ditch, which run around the head of Tamarak
 Gulch. (See maps) There are 405 acres to irrigate under the two ditches and the total
 amount (380) will be found on both blanks as it will require the combined waters of both
 to supply the lands.
