	(Name) Marks: As a part of this land is a light lava ash soil, it will require
	than the average allowance per acre to irrigate. Also a part of the gravelly
loam	is underlaid with loose gravel, making it necessary to apply a great deal
	ter, which is largely returned to the river. If there is more water
	able, would like to make this application for 10 second feet, which will
be.re	quired to fully irrigate the above lands.
