Remarks: The land on the hill tha	t I intend to use for Alfalfa will present
almost as great a problem for irrigat	ion as all the rest of my property. Conse-
quently that is the reason for wanting	g the well in the location as shown on the
	, up till this time, it is doubtful if I
would have used water any place other	than the hill.
I believe one or two sprinklings	a year will be sufficient for my low land
property.
