have examined the foregoing application and do hereby grant the same,

SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:							
The right herein granted is limited to the amount of water which can be applied to beneficial use and							
shell not exceed22 cubic feet per second measured at the point of diversion from the well or							
source of appropriation, or its equivalent in case of rotation with other water users, from							
The use to which this water is to be applied is _irrigation_ (supplemental)							
If for irrigation, this appropriation shall be limited to							
or its squivalent for each acre irrigated and shall be further limited to a							
diversion of not to smeed 3 acre feet per acre for each acre irrigated during the							
irrigation season of each year; and shall be still further limited to a diversion							
of not to exceed 2.2 C.f.S., provided further that the amount of water allowed herein together with the amount secured under any other right existing for the same lands shall not exceed the limitation allowed herein and shall be subject to such reasonable rotation system as may be ordered by the proper state officer. The well shall be so cased so as to prevent the loss of underground water. The priority date of this permit is							
Actual construction work shall begin on or before September 20, 1955 and shall							
thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1956.							
Complete application of the water to the proposed use shall be made on or before October 1, 127
