- NOTES
1. Stripping shall be approved by the engineer before placing fill. Stripped material shall not be used in the compacted fill.
 2. No borrow will be taken within 50ft of the upstream toe of the dike.
 3. All elevations based on TBMs on plan.
 4. The dike and all disturbed areas shall be seeded in permanent grass cover. See NRCS specifications.
 5. All work will be done in accordance with NRCS specifications.
 6. Owner is responsible for obtaining any needed permits, easements, or right of ways, and meeting any legal requirements.
 7. Landowner shall be responsible for locating and protecting all utilities. Special safety precautions to be taken when working in the vicinity of gas, oil, or electrical lines.
 8. Stop logs shall be free of from defects such as large knots or groups of knots near the center.
 9. Earth fill around pipe shall be uniformly and thoroughly compacted by hand equipment to a depth of at least 2 feet above the crown of the pipe before hauling or rolling equipment is permitted to pass over structure.
 10. All lumber shall be treated with CCA preservative to a 0.40 pcf retention.
 11. Contact the NRCS at least 7 days prior to the construction. Phone (503) 231-8270 ext. 106
