NOTE:

No evidence of section corners, 1/4 corners or original G.L.D. Survey work could be found in this area.

Section line location and dimensions are based on measurements and information taken from USC & GS topographic maps. The tie to the NE corner of Section 4, T.18S., R.9E. was made by Jean Hawthorne as shown on his "Water Application Permit Map" for MT. BACHELOR INC. dated Sept. 22, 1966.

The location of the proposed and existing waterline is approximate and subject to any inaccuracies which a subsequent survey of this township may reveal.
