- Recreation
- Navigation
- Pollution Abatement

Instream use proposed to be created by the instream transfer:

Originating Water Right Number (as identified in Part 4)	Priority Date	Source	Proposed Instream Period	Rate (cfs)*	Volume (ac-ft)**
48992	2/16/1972	Fifteenmile Creek	7/3 to 10/31	0.40	26.4

TOTAL VOLUME					50.8

Note: The instream rate may not exceed the max rate allowed by the existing right(s) and the total volume may not exceed to max volume or duty allowed by the existing right(s).

Additional Information: The information filled above are to match what was allowed in IL-594 which Cert 5678 is/was apart of.

Identify the location of the proposed instream water right.

Location (i.e. the point of diversion (POD) – use the POD Name or Number from Table 1):
_____.
- Water is requested to be protected within a reach:
Location of proposed reach (If an instream water right reach is requested, identify the upstream and downstream extent of the reach): Cert 48992 = from POD (River Mile 33.7) to the mouth, Cert 50112 = from POD (River Mile 33.3) to the mouth, and Cert 5678 = from POD (River Mile 24.5) to the mouth.

Recommendations for conditions on the instream use to avoid taking away or impairing existing water rights.

- None
- Other (such conditions may include, but are not limited to, reductions in the instream flow levels in cfs per month or total ac-ft, the effective reach(es) or lake levels of the instream flow, measuring locations and the strategy for monitoring the instream flow or lake levels): Use the same condition as IL-594, Below the POD the rates have been reduced by 42% to account for return flows and an additional 1% per mile reduction has been added to account for stream loss.

Are there any existing instream water rights on the same point or within the same requested reach(es) or lake, or on a portion thereof:

- No
- Yes (identify other instream water rights): 59678, 76220, 76772, and 76771.

Note: New instream water rights are generally (but not always) additive to instream water rights established under ORS 537.348 (instream transfer application process) and ORS 537.470 (allocation of conserved water) and replace a portion of instream water rights established under ORS 537.341 (state agency application process) or ORS 537.346 (conversion of minimum perennial streamflows) with an earlier priority date.

Is it your intent to have the proposed instream water right transfer be additive to any instream water right established under ORS 537.348 and ORS 537.470 and replace a portion of any instream water right established under ORS 537.341 and ORS 537.346 with an earlier priority date?

- Yes
- No. If no, please explain your intent below:

Replace a portion of any existing instream water right for Fifteenmile Creek with older priority dates from these water rights, no additions to any existing instream water right.

If the proposed conversion would add to the amounts of an existing instream water right(s) established under ORS 537.341 or 537.346, provide documentation demonstrating why additional instream flows are necessary. Supporting documentation should include information from the Oregon Dept. of Fish and Wildlife (ODFW) (fish life), Dept. of Environmental Quality (DEQ) (pollution abatement), and/or Parks and Recreation Dept. (recreation).

Is the requested instream flow intended to exceed the estimated average natural flow occurring from the drainage system?

RECEIVED

AUG 12 2010

- No; OR
- Yes (Provide supporting documentation that demonstrates why additional flows are significant for the public use requested.); OR
- Yes, and it is presumed that flows that exceed the estimated average natural flow or natural lake levels are significant because:
 - The requested flow does not exceed the maximum amount of any instream water right application applied for under ORS 537.341 (state agency instream water right application process) for the same reach or portion thereof, and the requested public use is for the same public use as the afore mentioned instream water right application, **and**
 - For the specified time period that flows are requested to exceed the estimated average natural flow or lake level, the stream is in an ODFW flow restoration priority watershed. A copy of the priority watershed map indicating the specific watershed involved should be

WATER RESOURCES DEPT
SALEM, OREGON

included with the application. Priority watershed maps may be found on the OWRD web page; or

- The stream is listed as water quality limited and DEQ has provided scientific information that demonstrates that increased flows would improve water quality. The scientific information provided by DEQ should be included with the transfer application.

For a Time Limited Instream Transfer, please answer the following:

- The time-limited instream transfer is for a specific number of years:
_____ Begin Year to _____ End Year
- Time-limited instream transfer is to terminate based upon other conditions:
Conditions: _____.

This instream right shall replace a portion of the existing instream rights for Fifteen Mile Creek, evidenced by Certificates 59678 and 64744, for the stream reach and period described above.

This certificate is issued to confirm a change in use and place of use approved by an order of the Water Resources Director approving Transfer 8217, and supersedes Certificate 5642, State Record of Water Right Certificates.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

DETERMINATION and
FINAL ORDER ON PROPOSED
INSTREAM LEASE

ORS 537.348 establishes the process in which a water right holder may submit a request to lease an existing water right for instream purposes. OAR Chapter 690, Division 077 implements the statutes and provides the Department's procedures and criteria for evaluating short-term instream lease applications.

Lessor
Paul Schanno
82163 Dufur Valley Road
Dufur, Oregon 97201

Findings of Fact

1. Paul Schanno filed an application to lease all of Certificates 5678, 40409, and 55638 to instream use. The Department assigned the application number L-594.
2. Certificate 55638 is a groundwater right for primary irrigation of 66.9 acres and supplemental irrigation of 24.4 acres. This right may not be leased instream. Groundwater rights are not one of the rights subject to being leased instream. OAR 690-077-0077(1).
3. The rights to be leased are as follows:

Certificate 5678:

Twp	Rng	Mer	Sec	Q-Q	Acres
1 S	14 E	WM	3	SW SW	2.55
1 S	14 E	WM	9	NE NE	14.10

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. The lease application includes the information required under OAR 690-077-0077(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(6). No comments were received.
5. The instream use has been clarified from the lease application and is as follows:
 Fifteenmile Creek
 Tributary to Columbia River in the Hood Basin
Instream Reach: Respective PODs (Approximately RM 24.5 for Certificate 5678 and RM 23.5 for Certificate 40409) to the mouth of Fifteenmile Creek.

For purposes of this instream lease, the POD for Certificate 5678 is specified as:
 5030 Feet North and 250 Feet East of the SW Corner of Section 10, T 1 S, R 14 E, W.M.,
 within the Rudio DLC 38

For purposes of this instream lease, the POD for Certificate 40409 is specified as: 3980
 Feet South and 1540 Feet East of the NW Corner of Section 3, T 1 S, R 14 E, W.M.,
 within the Rudio DLC 38

Certificate	Priority Date	Instream Rate (cfs)			Period Protected Instream
		POD	Below POD	End of Reach	
5678	1869	0.52	0.30	0.23	July 3 through October 31
40409	1872	0.35	0.20	0.15	July 3 through October 31

6. Other conditions to prevent injury and enlargement are: The rate at the POD associated with Certificate 40409 has been reduced by 0.03 cfs to allow for continued domestic and stock use. Below the POD the rates have been reduced by 42% to account for return flows, and an additional 1% per mile reduction has been added to account for stream loss.

The portion of Certificate 55638 that allows supplemental irrigation may not be exercised, since the primary right associated with those lands is being leased instream, under Certificate 40409. OAR 690-077-0077(13).

The following lands may not receive irrigation under Certificate 55638 during the term of the lease:

SUPPLEMENTAL IRRIGATION							
Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres

7. The rights being leased shall replace a portion of any existing instream water rights established pursuant to ORS 537.341 or 537.346 and be in addition to any instream water rights established pursuant to ORS 537.348 or 537.470. The total rate protected instream

shall not exceed the monthly rates established by the existing instream water rights established pursuant to ORS 537.341 or 537.346.

8. Based upon review of the application, comments received, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. This finding is made through an abbreviated review recognizing that the lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
9. If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077-0070 or OAR 690-077-0075 a new injury review shall be required. Transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of future leases or transfers.
10. The applicant requested that the lease terminate on December 31, 2018. The maximum time period that a right can be leased instream, without renewing it, is five years. OAR 690-077-0077(1). The lease will terminate on December 31, 2009.
11. The lessor has requested the option of terminating the lease early with written notice to the Department.

CONCLUSIONS OF LAW

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease agreement conforms to the applicable provisions of OAR 690-077-0015.

ORDER

Therefore, it is ORDERED:

1. That the Short-Term Lease as described herein is APPROVED.
2. The former place of use shall no longer receive water as part of these rights, including the supplemental portion of ground water certificate 55638, as described in Finding of Fact # 6, during the term of the lease.
3. The lease shall terminate on December 31, 2009. The lessor shall have the option of terminating the lease each year, with notification to the Department by June 3 of each year and before any irrigation has occurred on the property.

Dated at Salem, Oregon this 22nd day of February 2005.
