Description of Water Delivery System

WATER RESOURCES DEPT
 SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Groundwater appropriated from Well 1 and Well 2 was conveyed to an above ground storage tank adjacent to each well, which in turn supplied the irrigation system for the nursery. The irrigation system consisted primarily of impact sprinklers that irrigated approximately 98% of the nursery, with the remaining portion of the nursery being irrigated with hand sprinklers.**
