Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Water is diverted at POD C to the Erickson Ditch (also known as High Ditch), which connects to the Owens Ditch. Two ditches from the Owens Ditch convey water to the fields. Both ditches cross under the county road through separate 15-inch-diameter culverts that are constrictions to the ditches upstream of the culverts. A nomograph indicates the culverts can convey 6.5 cfs. Lateral ditches are used to flood irrigate the fields.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: Certificates 25922, 37254 & 86550.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # NA;
Surface water primary Certificate # NA.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # NA

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) OR

1,200 gallons per minute (gpm)

WATER RESOURCES DEPT
SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. POD A is a weir on the West Branch Rock Creek that allows water to be diverted to an open channel leading to Rock Creek Lake. The channel has a 36-inch-diameter CMP under a road that constricts the amount of water the channel can convey. A nomograph indicates the CMP can convey 40 cfs (17,952 gpm) to Rock Creek from POD A.

Water at POD B is diverted from Rock Creek Lake through a 18-inch-diameter HDPE pipeline that spans the Rock Creek drainage and connects to the Erickson Ditch (also known as the High Ditch) at a point downstream of POD C. The pipeline, which has a control valve in the lake, starts at elevation 4370, drops to elevation 2350 at the bottom of the drainage and ends at elevation 4285 feet at the Erickson Ditch according to design drawings. The pipeline capacity is 6.68 cfs (3,000 gpm) according to Bryan Gribskov of Cascade Pump.

Water from Rock Creek at POD C is diverted to the Erickson Ditch (also known as the High Ditch) through a 5-foot-length of fish screen in a culvert box before it enters a 24-inch-diameter welded steel pipe. The pipeline has a 1 inch fall in 4 feet of slope, providing a theoretical capacity of 20 cfs (8,976 gpm).

Water in the Erickson Ditch is conveyed to a location above the Flat Ranch where it enters about 1.7 miles of 10-inch-diameter PVC pipeline that gravity flows to a bulge in the system. The 10-inch pipeline, which has turnouts on it, is designed to convey 1,200 gpm according to Bryan Gribskov of Cascade Pump and Irrigation. A 30-hp centrifugal pump with a TDH of 87 feet forwards water from the bulge through approximately 1,000 of 10-inch-diameter PVC pipeline, which then becomes an 8-inch-diameter PVC pipeline. The 8 and 10-inch pipeline has turnouts for handlines and wheel lines. There are about 240 Acers that each deliver 5 gpm, for a total rate of 1,200 gpm.

Additional remarks: **No change in USE.** We were unable to resolve the 0.3 acre discrepancy in the transferred acreages in the Figures 3 and 7 From and To Maps, even following a review by Bruce Estes (CWRE #1). There will be 92.4 acres of remaining rights for supplemental irrigation left in place as shown on the Figure 3 From Map. There are an additional 129.0 acres of remaining rights not mapped per OAR 690-380-3100(2)f.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: 25670, 25922 & 86550.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # NA;

Surface water primary Certificate # NA.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # NA

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.
