Re: Proposed Allocation of Conserved Water Application (Terra Poma Land Co.)

To Whom It May Concern:

Terra Poma Land Company is providing notification of our intent to file an Allocation of Conserved Water application with the Oregon Water Resources Department. The conserved water application for Certificate 52082 (Jasa portion), with a priority date of July 29, 1973, is proposing to conserve 270 acre feet of Columbia River water that is currently used for irrigation. The application is proposing to leave 25 percent of the conserved water instream for the benefit of fish, environment, and recreation. The water left instream will be protected from the authorized Point of Diversion (NE ¼ NW ¼, Section 2, T 4 N, R 25 E, WM; 120 feet South and 2980 feet West from the NE corner of Section 2) on the Columbia River near Boardman, Oregon (~RM 271).

At this time we are requesting comments in support of the proposed Allocation of Conserved Water from the above listed agencies. If you have any questions regarding the proposed application, or are interested in receiving additional information please contact our representative, Molly Reid of GSI Water Solutions, Inc. at (509) 735-7135. Her email address is: mreid@gsiws.com.

Sincerely,

Glenn Chowning, President
Terra Poma Land Co.
