~II~ Instream Water Right Information

2.1 Public use. This lease will increase streamflows that will benefit:

- Conservation, maintenance and enhancement of aquatic and fish life, wildlife, and fish and wildlife habitat
 Pollution abatement
 Recreation and scenic attraction

2.2 Instream use created by lease. The instream use to be created is described as follows:

Deschutes River

Tributary to Columbia River in the Columbia Basin.

Describe the point of diversion (POD) and any associated reach(es) of the instream use being created. If possible list the reach by river mile. If no reach is identified, and there is only one POD listed on the certificate, the lease may be processed to be protected at the POD. (If more than one POD is listed on the certificate, then the POD and any associated reach(es) must be identified): From POD: SE ¼ NE 1/4 , section 29, T 17 S, R 12 E, W.M.; N 36 degrees 45' W. 1056.8 feet from the East ¼ corner of section 29 to the mouth of the Deschutes at RM 0.

Conditions to prevent injury, if any:

- None
 The instream flow will be allocated on a daily average basis up to the described rate from April 1 through October 27.
 Other (describe): Crook County Improvement District will be able to cancel this lease (if multi-year) without a landowner signature if necessary.

If you need to enter more instream uses, please use the additional water rights form.

2.3 Term of lease. This lease shall terminate on October 31, 2011.

2.4 Flow protection. The Trustee will regulate use of water from the source, subject to prior appropriation and the agency enforcement guidance, to assure the water is delivered to the point of diversion, and through the reach past junior downstream users, so long as flow is sufficient to meet the demand under priority date of the new instream use (see Section 2.2). As part of regulation activities the watermaster or a designee has access to the point of diversion and place of use for the water rights involved in this lease. No party is required to continuously measure the flow of the waterway described in Section 2.2.

~III~ Other Information

- 3.1 **Accuracy.** The Undersigned Lessor(s) and Lessee(s) declare that, to the best of their knowledge and belief, the information contained in this application is true, correct and complete. If after the lease order is signed, any information is determined to be false, the lease order may be modified or terminated. The lease only exercises the water rights being leased, for the term of the lease. It shall not be construed to overcome any claim that the water right may otherwise be subject to forfeiture for nonuse pursuant to ORS 540.610 during the period of time prior to the execution of the lease.
- 3.2 **Lease.** Lessor(s) and Lessee(s) agree to lease the water rights listed in Section(s) 1.5 for instream use for the term of this lease through Lessee to the Trustee, the Oregon Water Resources Department, pursuant to the provisions of ORS 537.348(2) and OAR 690-077.
- 3.3 **Precedent.** If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077 a new injury review shall be required, and a prior lease shall not set a precedent for the amount of water to be leased or transferred instream.
- 3.4 **Suspension of original use.** During the period of the lease, the water right holder agrees to suspend use of water allowed under the subject water rights and under any water right that is supplemental to the subject water rights.
- 3.5 **Termination provision.**
- For multiyear leases, the Lessor(s) shall have the option of terminating the lease each year with written notice to the Department. The lease may be terminated at any time during the calendar year. However, if the termination request is received less than 30-days prior to the period of allowed instream use or after the period of allowed use has begun for the water right(s) being leased, water may not be used under the right(s) leased until the following calendar year, unless the Director determines that enlargement would not occur. The Department may also require:
- Written notice to the Department with original signatures;
 - Consent by all parties to the lease; and/or
 - Written notice to the Watermaster's office.
- For multiyear leases, the lessor shall not have the option of terminating the lease, without consent by all parties to the lease.
- 3.6 **Modification to prevent injury.** Allocation of water to the instream use described in Section 2.2 during the term of this lease is not reasonably expected to cause injury to other rights to use water from the same source. If injury is found after this lease is signed, the lease may be modified or terminated to prevent injury.
- 3.7 **Fees.** Pursuant to ORS 536.050, the following fee is included:
- \$400 for an application with four or more landowners or four or more water rights.
- \$250 for all other applications.
