

Application for Water Right Transfer

Oregon Water Resources Department
 725 Summer Street NE, Suite A
 Salem, Oregon 97301-1266
 (503) 986-0900
 www.wrd.state.or.us

Part 1 of 4 – Minimum Requirements Checklist

This transfer application will be returned if Parts 1 through 4 and all required attachments are not completed and included.
 For questions, please call (503) 986-0900, and ask for Transfer Section.

FOR ALL TRANSFER APPLICATIONS

Check all items included with this application. (N/A = Not Applicable)

- Part 1 – Completed Minimum Requirements Checklist.
- Part 2 – Completed Transfer Application Map Checklist.
- Part 3 – Completed Transfer Application – Applicant Information and Signature.
- Part 4 – Completed Transfer Application – Water Right Information. Please include a separate Part 4 for each water right. List all water right certificates to be transferred here: **Certificates 86824, 83355, 85389, 85391, 86828, 86826, 85392, 85386, 85393, 85387, 85388.**

RECEIVED

Attachments:

- Completed Transfer Application Map.
- Completed Evidence of Use Affidavit and supporting documentation.
- Fees – Amount enclosed: \$ 2325.2457
 See the Department’s Fee Schedule at www.wrd.state.or.us or call (503) 986-0883.
- N/A Affidavit(s) of Consent.
- N/A Supplemental Form D – For water rights served by or issued in the name of an irrigation district. Complete when the transfer applicant is not the irrigation district.
- N/A Land Use Information Form with approval and signature (or signed land use form receipt stub). Not required if water is to be diverted, conveyed, and/or used only on federal lands or if **all** of the following apply: a) a change in place of use only, b) no structural changes, c) the use of water is for irrigation only, and d) the use is located within an irrigation district or an exclusive farm use zone.
- N/A For changes in point(s) of appropriation (well(s)) or additional point(s) of appropriation, Water Well Report/Well Log.
- N/A For Temporary Transfer (one to five years) Begin Year ____ End Year ____.
- N/A For Temporary Transfer only – Current recorded deed for the land **from** which the authorized place of use is being moved.
- N/A Temporary Drought Transfer (For use in counties where the Governor has declared drought)

Part 2 of 4 – Transfer Application Map Checklist

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://www1.wrd.state.or.us/pdfs/cwre_listing.pdf. CWRE stamp and signature are not required for temporary changes and substitutions.
- N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on white or clear paper or film.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, three (3) paper copies and an electronic copy in a .pdf, .tiff or .jpg format are required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at

least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or
Part 3 of 4 – Applicant Information and Signature 42.53764°).

Applicant Information

APPLICANT/BUSINESS NAME Three Sisters Irrigation District and District Patrons on Uncle John Ditch			PHONE NO. (541) 549-8815	ADDITIONAL CONTACT NO. see attached signature pages
ADDRESS P.O. Box 2230			FAX NO.	
CITY Sisters	STATE OR	ZIP 97759	E-MAIL office@tsidonline.org	

Agent Information – The agent is authorized to represent the applicant in all matters relating to this application.

AGENT/BUSINESS NAME Upper Deschutes Watershed Council			PHONE NO. 541-382-4077 x 11	ADDITIONAL CONTACT NO.
ADDRESS 700 NW Hill Street			FAX NO.	
CITY Bend	STATE OR	ZIP 97701	E-MAIL aaron@deschutesriver.org	

If an agent is listed above, please check **one** of the following:

- Please send all correspondence to Agent. Send copies of correspondence to Applicant; **OR**
- Please send all correspondence to Applicant. Send copies of correspondence to Agent.

Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? Yes No

If NO, include signatures of all landowners (and mailing address if different than the applicant's) or attach affidavits of consent (and mailing addresses) from all landowners or individuals/entities to which the water right(s) has been conveyed.

Permanent Transfers Only (check one box)

- By signing this application, I understand that, upon receipt of the draft preliminary determination and prior to Department approval of the transfer, I will be required to provide landownership information and evidence that I am authorized to pursue the transfer as identified in OAR 690-380-4010(5); **OR**
- I affirm the applicant is a municipality as defined in ORS 540.510(3)(b) and that the right is in the name of the municipality or a predecessor; **OR**
- I affirm that the applicant is an entity with the authority to condemn property and is acquiring by condemnation the property to which the water right proposed for transfer is appurtenant and have supporting documentation.

I (we) affirm that the information contained in this application is true and accurate.

_____ Applicant signature	see attached signature pages Name (and title if applicable) (print)	_____ Date
_____ Applicant signature	_____ Name (and title if applicable) (print)	_____ Date

In your own words tell us what change(s) you want made and the reason for the change(s): _____

Check the following boxes that apply:

- The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.
- The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.
- The receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.

At this time, are the lands in this transfer application in the process of being sold? Yes No

If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. (To learn about sale agreements please visit our web site at: <http://www1.wrd.state.or.us/pdfs/Transfer-PropertyTransactions.pdf>)

RECEIVING LANDOWNER NAME			PHONE NO.	ADDITIONAL CONTACT NO.
ADDRESS				FAX NO.
CITY	STATE	ZIP	E-MAIL	

Describe any special ownership circumstances here: _____

- Check here if any of the water rights proposed for transfer are or will be located within or served by an irrigation or other water district. (**Tip:** Complete and attach Supplemental Form D.)

CERTIFICATE # 86824

RECEIVED

Description of Water Delivery System

System capacity: 12 cubic feet per second (cfs) OR
 _____ gallons per minute (gpm)

WATER RESOURCES DEPT
 SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Nearly 7.3 cfs of water from Whychus Creek is diverted at the Uncle John Ditch POD and conveyed by Uncle John Ditch to over 378 acres of irrigated lands. The main ditch is approximately 2 miles long until bifurcates into two smaller ditches off of which water is applied to lands via sprinkler and flood irrigation. The point of diversion (POD) for Uncle John Ditch is described differently depending on the certificate: UJD(1)- accurate current description of the POD for water conveyed by Uncle John Ditch, UJD(2) - historical but inaccurate description of POD for senior water conveyed by Uncle John Ditch, and UJD(3) - undescribed POD. Water for all water rights included in this transfer have been diverted at UJD(1) time immemorial. The point of diversion for Uncle John Ditch is unscreened. At the beginning of every irrigation season heavy equipment is used to construct a push-up dam composed of river bed material in the river channel. An unmetered headgate just down from the point of diversion regulates flow into the main canal. Excess water is ponded and spills back into the creek near the point of diversion. The point of diversion for Uncle John Ditch is located upstream of TSID's authorized main diversion where the majority of the water is diverted for district. Because of the canal's close proximity to TSID's main line, TSID proposes to transfer the point of diversion for all water rights associated with Uncle John Ditch downstream to TSID's now screened main diversion, convey this water a short distance in the recently piped main canal and then turn the water into the Uncle John system via the current turnout where Uncle John Ditch crosses the TSID main line (see attached map). However, after water is diverted from Whychus Creek and into the Three Sisters Irrigation District main canal at TSID's main diversion, irrigation water delivered to Ski Pond Ranch, LLC under Certificate 85393 shall not be re-diverted into the Uncle John Ditch, but shall be conveyed in the Three Sisters Irrigation District main canal to the place of use described in certificate 85393. All places of use associated with this transfer will remain unchanged.**

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)

(Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

POD/POA Name or Number	Is this POD/POA Authorized on the Certificate or is it Proposed?	If POA, OWRD Well Log ID# (or Well ID Tag # L-___)	Twp	Rng	Sec	¼ ¼	Tax Lot, DLC or Gov't Lot	Measured Distances (from a recognized survey corner)

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # _____;

Surface water primary Certificate # _____.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # _____

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip:** You may search for well logs on the Department’s web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

Proposed or Authorized POA Name or Number	Is well already built? (Yes or No)	If an existing well, OWRD Well ID Tag No. L-___	Total well depth	Casing Diameter	Casing Intervals (feet)	Seal depth(s) (intervals)	Perforated or screened intervals (in feet)	Static water level of completed well (in feet)	Source aquifer (sand, gravel, basalt, etc.)	Well - specific rate (cfs or gpm). Description of Water Delivery System

System capacity: **12** cubic feet per second (cfs) OR
 _____ gallons per minute (gpm)

WATER RESOURCES DEPT
 SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Nearly 7.3 cfs of water from Whychus Creek is diverted at the Uncle John Ditch POD and conveyed by Uncle John Ditch to over 378 acres of irrigated lands. The main ditch is approximately 2 miles long until bifurcates into two smaller ditches off of which water is applied to lands via sprinkler and flood irrigation. The point of diversion (POD) for Uncle John Ditch is described differently depending on the certificate: UJD(1)- accurate current description of the POD for water conveyed by Uncle John Ditch, UJD(2) - historical but inaccurate description of POD for senior water conveyed by Uncle John Ditch, and UJD(3) - undescribed POD. Water for all water rights included in this transfer have been diverted at UJD(1) time immemorial. The point of diversion for Uncle John Ditch is unscreened. At the beginning of every irrigation season heavy equipment is used to construct a push-up dam composed of river bed material in the river channel. An unmetered headgate just down from the point of diversion regulates flow into the main canal. Excess water is ponded and spills back into the creek near the point of diversion. The point of diversion for Uncle John Ditch is located upstream of TSID's authorized main diversion where the majority of the water is diverted for district. Because of the canal's close proximity to TSID's main line, TSID proposes to transfer the point of diversion for all water rights associated with Uncle John Ditch downstream to TSID's now screened main diversion, convey this water a short distance in the recently piped main canal and then turn the water into the Uncle John system via the current turnout where Uncle John Ditch crosses the TSID main line (see attached map). However, after water is diverted from Whychus Creek and into the Three Sisters Irrigation District main canal at TSID's main diversion, irrigation water delivered to Ski Pond Ranch, LLC under Certificate 85393 shall not be re-diverted into the Uncle John Ditch, but shall be conveyed in the Three Sisters Irrigation District main canal to the place of use described in certificate 85393. All places of use associated with this transfer will remain unchanged.**

Nearly 7.3 cfs of water from Whychus Creek is diverted at the Uncle John Ditch POD and conveyed by Uncle John Ditch to over 378 acres of irrigated lands. The main ditch is approximately 2 miles long until bifurcates into two smaller ditches off of which water is applied to lands via sprinkler and flood irrigation. The point of diversion (POD) for Uncle John Ditch is described differently depending on the certificate: UJD(1)- accurate current description of the POD for water conveyed by Uncle John Ditch, UJD(2) - historical but inaccurate description of POD for senior water conveyed by Uncle John Ditch, and UJD(3) - undescribed POD. Water for all water rights included in this transfer have been diverted at UJD(1) time immemorial. The point of diversion for Uncle John Ditch is unscreened. At the beginning of every irrigation season heavy equipment is used to construct a push-up dam composed of river bed material in the river channel. An unmetered headgate just down from the point of diversion regulates flow into the main canal. Excess water is ponded and spills back into the creek near the point of diversion. The point of diversion for Uncle John Ditch is located upstream of TSID's authorized main diversion where the majority of the water is diverted for district. Because of the canal's close proximity to TSID's main line, TSID proposes to transfer the point of diversion for all water rights associated with Uncle John Ditch downstream to TSID's now screened main diversion, convey this water a short distance in the recently piped main canal and then turn the water into the Uncle John system via the current turnout where Uncle John Ditch crosses the TSID main line (see attached map). However, after water is diverted from Whychus Creek and into the Three Sisters Irrigation District main canal at TSID's main diversion, irrigation water delivered to Ski Pond Ranch, LLC under Certificate 85393 shall not be re-diverted into the Uncle John Ditch, but shall be conveyed in the Three Sisters Irrigation District main canal to the place of use described in certificate 85393. All places of use associated with this transfer will remain unchanged.

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)
 (Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

Description of Water Delivery System

System capacity: 12 cubic feet per second (cfs) OR
 _____ gallons per minute (gpm)

WATER RESOURCES DEPT
SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Nearly 7.3 cfs of water from Whychus Creek is diverted at the Uncle John Ditch POD and conveyed by Uncle John Ditch to over 378 acres of irrigated lands. The main ditch is approximately 2 miles long until bifurcates into two smaller ditches off of which water is applied to lands via sprinkler and flood irrigation. The point of diversion (POD) for Uncle John Ditch is described differently depending on the certificate: UJD(1)- accurate current description of the POD for water conveyed by Uncle John Ditch, UJD(2) - historical but inaccurate description of POD for senior water conveyed by Uncle John Ditch, and UJD(3) - undescribed POD. Water for all water rights included in this transfer have been diverted at UJD(1) time immemorial. The point of diversion for Uncle John Ditch is unscreened. At the beginning of every irrigation season heavy equipment is used to construct a push-up dam composed of river bed material in the river channel. An unmetered headgate just down from the point of diversion regulates flow into the main canal. Excess water is ponded and spills back into the creek near the point of diversion. The point of diversion for Uncle John Ditch is located upstream of TSID's authorized main diversion where the majority of the water is diverted for district. Because of the canal's close proximity to TSID's main line, TSID proposes to transfer the point of diversion for all water rights associated with Uncle John Ditch downstream to TSID's now screened main diversion, convey this water a short distance in the recently piped main canal and then turn the water into the Uncle John system via the current turnout where Uncle John Ditch crosses the TSID main line (see attached map). However, after water is diverted from Whychus Creek and into the Three Sisters Irrigation District main canal at TSID's main diversion, irrigation water delivered to Ski Pond Ranch, LLC under Certificate 85393 shall not be re-diverted into the Uncle John Ditch, but shall be conveyed in the Three Sisters Irrigation District main canal to the place of use described in certificate 85393. All places of use associated with this transfer will remain unchanged.**

Description of Water Delivery System

System capacity: 12 cubic feet per second (cfs) OR
 _____ gallons per minute (gpm)

WATER RESOURCES DEPT
 SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Nearly 7.3 cfs of water from Whychus Creek is diverted at the Uncle John Ditch POD and conveyed by Uncle John Ditch to over 378 acres of irrigated lands. The main ditch is approximately 2 miles long until bifurcates into two smaller ditches off of which water is applied to lands via sprinkler and flood irrigation. The point of diversion (POD) for Uncle John Ditch is described differently depending on the certificate: UJD(1)- accurate current description of the POD for water conveyed by Uncle John Ditch, UJD(2) - historical but inaccurate description of POD for senior water conveyed by Uncle John Ditch, and UJD(3) - undescribed POD. Water for all water rights included in this transfer have been diverted at UJD(1) time immemorial. The point of diversion for Uncle John Ditch is unscreened. At the beginning of every irrigation season heavy equipment is used to construct a push-up dam composed of river bed material in the river channel. An unmetered headgate just down from the point of diversion regulates flow into the main canal. Excess water is ponded and spills back into the creek near the point of diversion. The point of diversion for Uncle John Ditch is located upstream of TSID's authorized main diversion where the majority of the water is diverted for district. Because of the canal's close proximity to TSID's main line, TSID proposes to transfer the point of diversion for all water rights associated with Uncle John Ditch downstream to TSID's now screened main diversion, convey this water a short distance in the recently piped main canal and then turn the water into the Uncle John system via the current turnout where Uncle John Ditch crosses the TSID main line (see attached map). However, after water is diverted from Whychus Creek and into the Three Sisters Irrigation District main canal at TSID's main diversion, irrigation water delivered to Ski Pond Ranch, LLC under Certificate 85393 shall not be re-diverted into the Uncle John Ditch, but shall be conveyed in the Three Sisters Irrigation District main canal to the place of use described in certificate 85393. All places of use associated with this transfer will remain unchanged.

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)
 (Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # _____;

Surface water primary Certificate # _____.

RECEIVED

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # _____

WATER RESOURCES DEPT
SALEM, OREGON

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip:** You may search for well logs on the Department’s web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

Proposed or Authorized POA Name or Number	Is well already built? (Yes or No)	If an existing well, OWRD Well ID Tag No. L-_____	Total well depth	Casing Diameter	Casing Intervals (feet)	Seal depth(s) (intervals)	Perforated or screened intervals (in feet)	Static water level of completed well (in feet)	Source aquifer (sand, gravel, basalt, etc.)	Well - specific rate (cfs or gpm). If less than full rate of water right

Part 4 of 4 – Water Right Information

Please use a separate Part 4 for each water right being changed. See instructions at <http://www.wrd.state.or.us/OWRD/PUBS/forms.shtml>.

CERTIFICATE # 85388

RECEIVED

Description of Water Delivery System

System capacity: 12 cubic feet per second (cfs) **OR**
 _____ gallons per minute (gpm)

NOV 17 2010
 WATER RESOURCES DEPT
 SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Nearly 7.3 cfs of water from Whychus Creek is diverted at the Uncle John Ditch POD and conveyed by Uncle John Ditch to over 378 acres of irrigated lands. The main ditch is approximately 2 miles long until bifurcates into two smaller ditches off of which water is applied to lands via sprinkler and flood irrigation. The point of diversion (POD) for Uncle John Ditch is described differently depending on the certificate: UJD(1)- accurate current description of the POD for water conveyed by Uncle John Ditch, UJD(2) - historical but inaccurate description of POD for senior water conveyed by Uncle John Ditch, and UJD(3) - undescribed POD. Water for all water rights included in this transfer have been diverted at UJD(1) time immemorial. The point of diversion for Uncle John Ditch is unscreened. At the beginning of every irrigation season heavy equipment is used to construct a push-up dam composed of river bed material in the river channel. An unmetered headgate just down from the point of diversion regulates flow into the main canal. Excess water is ponded and spills back into the creek near the point of diversion. The point of diversion for Uncle John Ditch is located upstream of TSID's authorized main diversion where the majority of the water is diverted for district. Because of the canal's close proximity to TSID's main line, TSID proposes to transfer the point of diversion for all water rights associated with Uncle John Ditch downstream to TSID's now screened main diversion, convey this water a short distance in the recently piped main canal and then turn the water into the Uncle John system via the current turnout where Uncle John Ditch crosses the TSID main line (see attached map). However, after water is diverted from Whychus Creek and into the Three Sisters Irrigation District main canal at TSID's main diversion, irrigation water delivered to Ski Pond Ranch, LLC under Certificate 85393 shall not be re-diverted into the Uncle John Ditch, but shall be conveyed in the Three Sisters Irrigation District main canal to the place of use described in certificate 85393. All places of use associated with this transfer will remain unchanged.

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)
 (Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

POD/POA Name or Number	Is this POD/POA Authorized on the Certificate or is it Proposed?	If POA, OWRD Well Log ID# (or Well ID Tag # L-___)	Twp	Rng	Sec	¼ ¼	Tax Lot, DLC or Gov't Lot	Measured Distances (from a recognized survey corner)
UJD(1)	<input checked="" type="checkbox"/> Authorized <input type="checkbox"/> Proposed		15 S	10 E	21	SW SW	1400	UNCLE JOHN DITCH- 140 FEET NORTH AND 1190 FEET EAST FROM THE SW CORNER, SECTION 21
TSID MAIN	<input type="checkbox"/> Authorized <input checked="" type="checkbox"/> Proposed		15 S	10 E	21	SW SW		998 FEET NORTH AND 1211 FEET EAST FROM SW CORNER OF SECTION 21

	<input type="checkbox"/> Authorized							
	<input type="checkbox"/> Proposed							
	<input type="checkbox"/> Authorized							
	<input type="checkbox"/> Proposed							

Check all type(s) of change(s) proposed below (change “CODES” are provided in parentheses):

- | | |
|---|---|
| <input type="checkbox"/> Place of Use (POU) | <input type="checkbox"/> Supplemental Use to Primary Use (S to P) |
| <input type="checkbox"/> Character of Use (USE) | <input type="checkbox"/> Point of Appropriation/Well (POA) |
| <input checked="" type="checkbox"/> Point of Diversion (POD) | <input type="checkbox"/> Additional Point of Appropriation (APOA) |
| <input type="checkbox"/> Additional Point of Diversion (APOD) | <input type="checkbox"/> Substitution (SUB) |
| <input type="checkbox"/> Surface Water POD to Ground Water
POA (SW/GW) | <input type="checkbox"/> Government Action POD (GOV) |

Will all of the proposed changes affect the entire water right?

- Yes Complete only the Proposed (“to” lands) section of Table 2 on the next page. Use the “CODES” listed above to describe the proposed changes.
- No Complete all of Table 2 to describe the portion of the water right to be changed.
