Application for Water Right Temporary or Drought Temporary Transfer

Part 1 of 4 – Minimum Requirements Checklist

This temporary transfer application will be returned if Parts 1 through 4 and all required attachments are not completed and included.
 For questions, please call (503) 986-0900, and ask for Transfer Section.

FOR ALL TEMPORARY TRANSFER APPLICATIONS

Check all items included with this application. (N/A = Not Applicable)

- Part 1 – Completed Minimum Requirements Checklist.
- Part 2 – Completed Temporary Transfer Application Map Checklist.
- Part 3 – Completed Temporary Transfer Application – Applicant Information and Signature.
- Part 4 – Completed Temporary Transfer Application – Water Right Information. Please include a separate Part 4 for each water right. List all water right certificates to be transferred here: **81168**.
- N/A For Temporary Transfer (one to five years) **Begin Year 2012 End Year 2016**.
- N/A Temporary Drought Transfer (For use in counties where the Governor has declared drought)

Attachments:

- Completed Temporary Transfer Application Map.
- Completed Evidence of Use Affidavit and supporting documentation.
- Current recorded deed for the land **from** which the authorized place of use is temporarily being moved.
- N/A Affidavit(s) of Consent.
- Fees – Amount enclosed: \$ **600.00**.
 See <http://www.wrd.state.or.us/OWRD/PUBS/forms.shtml#fees> or call (503) 986-0883.
- N/A Supplemental Form D – For water rights served by or issued in the name of a district. Complete when the temporary transfer applicant is not the district.
- N/A Land Use Information Form with approval and signature (or signed land use form receipt stub). Not required if water is to be diverted, conveyed, and/or used only on federal lands or if **all** of the following apply: a) a change in place of use only, b) no structural changes, c) the use of water is for irrigation only, and d) the use is located within an irrigation district or an exclusive farm use zone.
- N/A For changes in point(s) of appropriation (well(s)) or additional point(s) of appropriation, if necessary to convey the water to the new temporary place of use, Water Well Report(s)/Well Log(s).

Part 2 of 4 – Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? Yes No

If NO, include signatures of all landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or e-mail addresses) from all landowners or individuals/entities to which the water right(s) has been conveyed.

I (we) affirm that the information contained in this application is true and accurate.

 Applicant signature	Ben Johnson, President Print Name (and Title if applicable)	5-14-2012 Date
Applicant signature	Print Name (and Title if applicable)	Date

In your own words tell us what change(s) you want made and the reason for the change(s): **The proposed temporary transfer of a portion of the water and water right authorized under Certificate No. 81168 is necessary to provide irrigation to a recreational area and memorial park located on the Applicant's property. These areas will eventually be subject to permanent irrigation in the future as the Applicant obtains additional water rights which have been applied for, but which are still in the permitting approval process. As confirmed later in this application, all irrigation systems necessary to irrigate the "to" lands are already in place and fully operational.**

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

Pursuant to ORS 540.525, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if necessary to convey the water to the new temporary place of use:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department’s web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

EXHIBIT A
To Temporary Transfer Application

Application Part 4 of 4 - Water Right Information

*

System Capacity: This number represents the maximum minimum rate of withdrawal (at 940gpm) of CRR&MA Well No. 1 identified under Certificate No. 81168. Well No. 1 serves the lands subject to temporary transfer. The actual distribution system beyond the Well No. 1 pump (which is rated at 1200 gpm) possesses an operational capacity in excess of 1200 gpm.

**

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use.

Response:

Pursuant to Certificate No. 81168, water is currently distributed for irrigation from Crooked River Ranch Club & Maintenance Association (CCR) Well No. 1 to the "from lands" and other lands located in Section 14 and additional lands and ponds all located in Section 24. A description of the distribution system through which water from CRR Well No. 1 is made available for beneficial use on the "from lands" is provided below. A description of the remainder of the distribution system through which water from CRR Well No. 1 is made available for beneficial use on lands in Section 24 is provided under final proof documentation submitted in Application T-6828.

As of the date of this application, CRR has in place a complete irrigation system for the recreational area and memorial park (the "to lands") that shall be used to apply to beneficial use that portion of the water rights subject to temporary transfer as proposed. These areas are located in Section 23 as shown on the accompanying map and straddle the 10-inch main line used to distribute water to lands in Section 24.

Irrigation of the "from" lands

a. Piping

CRR Well No. 1 is equipped with a 150hp vertical turbine pump which discharges irrigation water to a distribution system initially consisting of a "T" to two separate 10-inch lines. One line off the "T" distributes water to the "from lands" and other contiguous acreage and the other line off the "T" distributes water to lands in Section 24. The main line off the "T" that is used to distribute water to the "from lands" is a 10-inch schedule 40 steel line which is connected to a number of 6-inch steel laterals. Each lateral is fitted with a sprinkler head approximately every 60 feet. Each lateral distributes water to approximately ten (10) sprinkler heads. The main line off the "T" that is used to distribute water to Section 24 is a class 160 PVC line and is shown on the accompanying map.

b. Sprinkler Heads

Make and Model: Rainbird Impact 70, 35 gpm each (approx. 60 total), all for irrigation of the "from lands."

Size: 1" inlet

Max. number of Sprinklers operating at one time on "from lands:" Approx. 60.

Pressure of system for irrigation of "from lands:" 89-90PSI.
