SUBJECT: Water Right Transfer Application T-11366

Please find enclosed the second revised Preliminary Determination indicating that based on the information available, the Department intends to approve application T-11366. This document reflects the withdrawal of the request for diminishment to supplemental irrigation of Certificates 42788 and 44577. Water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department.

An additional public notice in the Department's weekly publication is required at this time and the protest period will expire 30 days after the date of this public notice.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. We will be coordinating the issuance of the Final Order to be simultaneous with the Order for your Application G-17461.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0881 or teri.k.hranac@wrд.state.or.us, if I may be of assistance.

Sincerely,

for Teri Hranac

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department’s procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

5 S	1 E	WM	10	SW NW	1380 FEET SOUTH AND 1230 FEET EAST FROM THE NW CORNER OF SECTION 10

- Transfer Application T-11366 also proposes to change the place of use of 14.8 acres of the right to:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
5 S	1 E	WM	10	SE NW	14.8

- Notice of the application for transfer was published on March 13, 2012, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
- On July 31, 2012, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11366 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of August 31, 2012, for the applicant to respond. Transfer Review Criteria (OAR 690-380-4010)

- Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
- A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11366.
- The proposed change would not result in enlargement of the rights.
- The proposed change would not result in injury to other water rights.
- Transfer Application T-11366 is contingent upon approval of Application G-17461.

Determination and Proposed Action

The additional points of appropriation and changes in places of use proposed in Transfer Application T-11366 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000, the abandoned right should be cancelled. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved and the abandoned right will be cancelled.

If Transfer Application T-11366 is approved, the final order will include the following:

1. *The additional points of appropriation and changes in places of use proposed in Transfer Application T-11366 are approved. The portion of the right that has been abandoned is cancelled.*
2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 42788 and 44577 and any related decree.*
3. *Water right certificate 42788 and 44577 are cancelled.*

4. *The quantity of water diverted at the additional points of appropriation, together with that diverted at the original point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.*
5. *Water use measurement conditions:*
 - a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).*
 - b. *The water user shall maintain the meters or measuring devices in good working order.*
 - c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices is located within a private structure, the Watermaster shall request access upon reasonable notice.*
6. *Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*
7. *The former places of use of the transferred rights shall no longer receive water under the rights.*
8. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2015**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*
9. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*
