Other Water Rights

Are there other water right certificates, water use permits or ground water registrations associated with the “from” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

 Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

Table 1. Location of Authorized Point(s) of Diversion (POD)

(Note: If the POD name is not specified on the certificate, assign it a name or number here. Also, if the POD is not described in the Certificate, provide a description below)

POD Name or Number	Priority Date (if different between PODs)	Twp	Rng	Sec	¼ ¼	Tax Lot, DLC or Gov't Lot	Measured Distances (from a recognized survey corner)

Will the proposed instream transfer affect the entire water right?

Yes Then Table 2 on Page 6 does not need to be completed.

No Then complete all of Table 2 to describe the portion of the water right to be changed.

Please use additional pages of Table 2 as needed

Table 2. Description of Change to Water Right Certificate # 86855

List only the part of the right that will be changed. For the acreage in each quarter-quarter, list the change proposed. If more than one change, specify the acreage associated with each change. If more than one POD, specify the acreage associated with each POD.

Part 5 of 5 – Proposed Instream Use Information

Identify the Public Use for which the instream right is requested (check at least one box):

- Conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values.
- Recreation
- Navigation
- Pollution Abatement

Instream use proposed to be created by the instream transfer:

Originating Water Right Number (as identified in Part 4)	Priority Date	Source	Proposed Instream Period	Rate (cfs)*	Volume (ac-ft)**
86855	SEPT 1, 1898	BIG MARSH CREEK	APRIL 1 – JULY 15		3.4
TOTAL VOLUME					3.4

***Tip:** To calculate rate (if other than the rate allowed by the right), divide the volume by the number of days in the period and then divide by 1.983471; or

****Tip:** To calculate volume, multiply the rate by the number of days in the instream period and then multiply by 1.983471.

Note: The instream rate may not exceed the max rate allowed by the existing right(s) and the total volume may not exceed to max volume or duty allowed by the existing right(s).

Additional Information: NA.

Identify the location of the proposed instream water right.

- Water is requested to be protected at a point.
Location (i.e. the point of diversion (POD) – use the POD Name or Number from Table 1): _____.
- Water is requested to be protected within a reach:
Location of proposed reach (If an instream water right reach is requested, identify the upstream and downstream extent of the reach): **POD TO LAKE BILLY CHINOOK.**

Recommendations for conditions on the instream use to avoid taking away or impairing existing water rights.

- None
- Other (such conditions may include, but are not limited to, reductions in the instream flow levels in cfs per month or total ac-ft, the effective reach(es) or lake levels of the instream flow, measuring locations and the strategy for monitoring the instream flow or lake levels): _____.

RECEIVED BY OWRD

DEC 21 2012

Are there any existing instream water rights on the same point or within the same requested reach(es) or lake, or on a portion thereof:

- No Yes (identify other instream water rights):
CRESENT CREEK – 73234, 73236, 84352, & 86854. LITTLE DESCHUTES 73226, 73227, 73228, 73234, 73236, 73261, 73262, 73263, 83652, 84352, 86020, 86021, 86854, & 87047. MAIN STEM DESCHUTES – NUMEROUS – SEE LIST MAINTAINED BY LAURA WILKE.

Note: New instream water rights are generally (but not always) additive to instream water rights established under ORS 537.348 (instream transfer application process) and ORS 537.470 (allocation of conserved water) and replace a portion of instream water rights established under ORS 537.341 (state agency application process) or ORS 537.346 (conversion of minimum perennial streamflows) with an earlier priority date.

Is it your intent to have the proposed instream water right transfer be additive to any instream water right established under ORS 537.348 and ORS 537.470 and replace a portion of any instream water right established under ORS 537.341 and ORS 537.346 with an earlier priority date?

- Yes No. If no, please explain your intent below: _____.

If the proposed conversion would add to the amounts of an existing instream water right(s) established under ORS 537.341 or 537.346, provide documentation demonstrating why additional instream flows are necessary. Supporting documentation should include information from the Oregon Dept. of Fish and Wildlife (ODFW) (fish life), Dept. of Environmental Quality (DEQ) (pollution abatement), and/or Parks and Recreation Dept. (recreation).

Is the requested instream flow intended to exceed the estimated average natural flow or level occurring from the drainage system?

- No; **OR**
 Yes (Provide supporting documentation that demonstrates why additional flows are significant for the public use requested.); **OR**
 Yes, and it is presumed that flows that exceed the estimated average natural flow or natural lake levels are significant because:
 The requested flow does not exceed the maximum amount of any instream water right application applied for under ORS 537.341 (state agency instream water right application process) for the same reach or portion thereof, and the requested public use is for the same public use as the afore mentioned instream water right application, **and**
 For the specified time period that flows are requested to exceed the estimated average natural flow or lake level, the stream is in an ODFW flow restoration priority watershed. A copy of the priority watershed map indicating the specific watershed involved should be included with the application. Priority watershed maps may be found on the OWRD web page; **or**
 The stream is listed as water quality limited and DEQ has provided scientific information that demonstrates that increased flows would improve water quality. The scientific information provided by DEQ should be included with the transfer application.

For a Time Limited Instream Transfer, please answer the following:

- The time-limited instream transfer is for a specific number of years:
_____ Begin Year to _____ End Year
 Time-limited instream transfer is to terminate based upon other conditions:
Conditions: _____.
