Your transfer application will be returned if any of the map requirements listed below are not met. Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply. \boxtimes N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions. X N/A If more than three water rights are involved, separate maps are needed for each water right. \boxtimes Permanent quality printed with dark ink on good quality paper. \boxtimes The size of the map can be $8\frac{1}{2} \times 11$ inches, $8\frac{1}{2} \times 14$ inches, 11×17 inches, or up to 30×30 inches. For 30 x 30 inch maps, one extra copy is required. \boxtimes A north arrow, a legend, and scale. \boxtimes The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department. \boxtimes Township, Range, Section, ¼¼, DLC, Government Lot, and other recognized public land survey lines. \boxtimes Tax lot boundaries (property lines) are required. Tax lot numbers are recommended. X Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads. \boxtimes Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches. \boxtimes Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged. \boxtimes N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. \boxtimes Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit. N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location RECEIVED BY OWRED a label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example - 42°32'15.5") or degrees-decimal with five or DEC 28 2012 more digits after the decimal (example – 42.53764°).

CERTIFICATE # 87298 (Map 1 of 7)

Description of Water Delivery System System capacity: 0.84 cubic feet per second (cfs) OR _____ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Well # B is located in the SESE of Section 19 just west of the east section line and just south of Frontage Road along the south side to Highway I-84. It has a 30 hp submersible pump installed in it. From the well pump discharge line there is a buried pipeline that extends approximately 400 feet in a south direction where it bends to the west and then extends an additional 900 feet +/- in a northwesterly direction generally paralleling Frontage Road along Highway I-84. This 900 foot pipeline segment is along the southerly edge of the irrigated area. There are buried lateral pipelines that connect to the 900 foot segment of pipeline. The lateral pipelines run in a north direction from 900 foot segment of pipeline. Pop up sprinklers, Rainbird 5500 with yellow nozzles, are installed along the lateral pipelines so they form a 50 foot +/- triangular spacing and are used to irrigate pasture. At the head of the lateral pipelines there are electric solenoid valves installed along the 900 foot segment of pipeline. The solenoid valves are used in conjunction with a Rainbird ESP 12-LX Plus electric irrigation controller installed in a well pump house located at the well which contains the electrical controls for the pump.

Description of Water Delivery System

System capacity: 0.193 cubic feet per second (cfs) OR

____ gallons per minute (gpm)

SALEM, OR

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Two wells are authorized to serve the 3 acres of this rights that are involved in this transfer. Each well is equipped with a 100 hp turbine pump that deliver water to the 3 acres located in the north half of a mini circle. An eight inch line runs due south from Well 1 about 1000 ft to the southerly edge of the circle in the NW ¼ of Section 28. At this point there is an 8 inch line approximately 1000 ft in length coming north from Well 2 to the southerly edge of circle located in the NW ¼ of Section 28. The two pipes connect at this point. At this point two 4 inch lines connect to the eight inch lines, one running east and one running west. The 4" line running west serves the mini circle that is involved in this transfer.

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Twenty three (23) wells are described in this Water right for the Supplemental Irrigation of 5074.48 acres. Of these 23 wells 5 are involved in this transfer for the transferring of 17.5 acres of primary irrigation described in 4 water rights (Certificates 60522, 81895, 53373, & 44539). This portion of this transfer describes the supplemental right for these 17.50 acres. The wells and the associated delivery systems are described in the separate Part 4 of 4 sections for Water Rights 5 of 8 through 7 of 8 previously listed in this application.

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA) (Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)
