Evampl	e for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 10	() acres) a	ind 45 0 acres

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

- 1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)
- 2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

WATER RESOURCES DEPT

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Water is pumped from Well 2 (7.5 Hp submersible pump) and conveyed to the storage pond. Water is pumped from the storage pond and convyed to the places of use using three centrifugal pumps (7.5, 10, and 25 Hp), either individually, or in combination, for irrigation using high pressure sprinklers.

Additional remarks: This transfer adds Well 1 (MARI 2172), which was the original point of appropriation for this water right before T-6952, and also adds Well 6, which was drilled after T-6952 was submitted. It is also the intent with this transfer to clarify that the use originally described in the certificate simply as "commercial use in greenhouses" is what is known today as nursery use on 5.1 acres.
