JAN 15 2014

Are there any existing instream water rights on the same point or within the same requested reach(es) or lake, or on a portion thereof?
☑ Yes (identify other instream water rights):
Note: New instream water rights are generally (but not always) additive to instream water rights established under ORS 537.348 (instream transfer application process) and ORS 537.470 (allocation of conserved water) and replace a portion of instream water rights established under ORS 537.341 (state agency application process) or ORS 537.346 (conversion of minimum perennial streamflows) with an earlier priority date.
Is it your intent to have the proposed instream water right transfer be additive to any instream water right established under ORS 537.348 and ORS 537.470 and replace a portion of any instream water right established under ORS 537.341 and ORS 537.346 with an earlier priority date?
☐ Yes ☐ No. If no, please explain your intent below:
There are no existing instream rights. The intent of this application is to provide mitigation for a new groundwater permit application.
If the proposed conversion would add to the amounts of an existing instream water right(s) established under ORS 537.341 or 537.346, provide documentation demonstrating why additional instream flows are necessary. Supporting documentation should include information from the Oregon Dept. of Fish and Wildlife (ODFW) (fish life), Dept. of Environmental Quality (DEQ) (pollution abatement), and/or Parks and Recreation Dept. (recreation).
Is the requested instream flow intended to exceed the estimated average natural flow or level occurring from the drainage system?
⊠ No; OR
Yes (Provide supporting documentation that demonstrates why additional flows are significant for the public use requested.); OR
Yes, and it is presumed that flows that exceed the estimated average natural flow or natural lake levels are significant because:
The requested flow does not exceed the maximum amount of any instream water right application applied for under ORS 537.341 (state agency instream water right application process) for the same reach or portion thereof, and the requested public use is for the same public use as the afore mentioned instream water right application, and
For the specified time period that flows are requested to exceed the estimated average natural flow or lake level, the stream is in an ODFW flow restoration priority watershed. A copy of the priority watershed map indicating the specific watershed involved should be included with the application. Priority watershed maps may be found on the OWRD web page; or
☐ The stream is listed as water quality limited and DEQ has provided scientific information that demonstrates that increased flows would improve water quality. The scientific information provided by DEQ should be included with the transfer application.
For a Time Limited Instream Transfer, please answer the following:
☐ The time-limited instream transfer is for a specific number of years:
Begin Year to End Year
☐ Time-limited instream transfer is to terminate based upon other conditionsRECEIVED BY OWRD
Conditions:

Please use a separate Part 6 for each water right being changed. See instructions on page 8, to copy and paste additional Part 6s, or to add additional rows to tables within the form.

CERTIFICATE #
Name on Certificate: <u>Martin Hansen, Cecil W. Drinkward, Sally A. Drinkward</u>
Date(s) of Priority: 1888
Source(s) of Water to be Affected by the Transfer: <u>Lake Creek</u>
Description of Water Delivery System

System capacity: <u>0.05</u> cubic feet per second (cfs) **OR**gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Water flows from a ditch into the pond.

Water from the pond is either diverted into a series of ditches for flood irrigation of pasture or pumped into a sprinkler system to irrigate lawn and garden.

Other Water Rights

Are there other water right certificates, water use permits or ground water registrations associated with the "from" lands? \square Yes \boxtimes No

If YES, list the certificate, water use permit, or ground water registration numbers: NA.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

Table 1. Location of Authorized Point(s) of Diversion (POD)

(Note: If the POD name is not specified on the certificate, assign it a name or number here. Also, if the POD is not described in the Certificate, provide a description below)

POD Name or Number	Priority Date (if different between PODs)	erent Type			if different Page Sec 1/4 1/4			Tax Lot, DLC or Gov't Lot	Measured Distances (from a recognized survey corner)

□ Yes Then Table 2 on Page 10 does not need to be completed.
 □ No Then complete all of Table 2 to describe the portion of the water right to be changed.

JAN 15 2014

Please use additional pages of Table 2 as needed. See page 8 for instructions. If you have further questions about how to fill out the tables, contact the Department at 503-986-0900 and ask for Transfer Staff.

Table 2. Description of Change to Water Right Certificate # 87472

List only the part of the right that will be changed. If more than one POD serves the lands, specify the acreage associated with each POD.

Additional remarks: The purpose of this instream transfer is to provide the necessary mitigation for an application to appropriate groundwater.

NOTE: POD 1 on the map is diversion supplying the ditch that has always delivered water to the applicant's land. The authorized POD 2 is also shown.
