Explain in your own words what you propose to accomplish with this transfer application, and why:
 The City of Island City desires to add an additional Point of Appropriation (APOA) to Certificate 62005. The APAO is the City's proposed Well No. 5. Proposed Well No. 5 will have a new steel aboveground reservoir adjacent to the well to better help supply the City's water distribution system. There will also be a new pump station building with new pumping system controls that will be located adjacent to the well. All of these water system improvements are part of the City's effort to complete necessary upgrades to the existing Island City water distribution system.

Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? Yes No *If NO, include signatures of all deeded landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or e-mail addresses) from all landowners or individuals/entities to which the water right(s) were conveyed.*

Check the following boxes that apply:

- The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.
- The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.
- Both the receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.

At this time, are the lands in this transfer application in the process of being sold? Yes No

If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. For more information see: <http://www.oregon.gov/owrd/docs/transfer-propertytransactions.pdf>

Description of Water Delivery System

MAR 13 2014

System capacity: 1 cubic feet per second (cfs) OR
449 gallons per minute (gpm)

SALEM, OR

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **The City of Island City's water system consists of four water supply wells, City Wells No. 1, 2, 3, and 4. The system has two existing steel aboveground water storage reservoirs, a 106,000-gallon reservoir on the north end of the City's Urban Growth Boundary (UGB) adjacent to Well No. 1, and a 750,000-gallon reservoir on the west side of the City's UGB adjacent to Well No. 4, as shown on the Transfer Map. Certificate No. 62005 is a one of the City's Municipal Rights to use the water from City Wells No. 1 and 2.**

The water flow from Well No. 1 is connected with a 10-inch diameter PVC water transmission line that leads through a series of valves into the adjacent storage reservoir and then to a booster pump station that supplies a consistent pressure to the City's water distribution system. The water flow from Well No. 2 is connected with a 6-inch diameter PVC water transmission line that leads into the City's water distribution system.

The City of Island City has historically utilized Wells No. 1 and 2 in conjunction with the other wells to meet water demands in the City's water use area. The City is currently restricted in the use of Well No. 1 due to high nitrate levels. All of the City's wells are operated as part of an on-demand telemetry system that can activate the wells based on set points at the water booster pump station. The booster pump station is located at the Well No. 4 and 750,000-gallon reservoir site. The on-demand system is activated through system controls as needed to keep a consistent water level in the reservoir and maintain the water pressure in the distribution system.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: **Island City Municipal Water Rights; Permit G-11683 (Well No. 4) and Permit G-14999 (Well No. 3).**

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation: Well Logs for Well Nos. 1 and 2 are attached

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department’s web page at:
http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
