#### Your transfer application will be returned if any of the map requirements listed below are not met. Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply. N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre license view/. CWRE stamp and signature are not required for substitutions. N/A If more than three water rights are involved, separate maps are needed for each water right. $\boxtimes$ Permanent quality printed with dark ink on good quality paper. $\boxtimes$ The size of the map can be $8\frac{1}{2} \times 11$ inches, $8\frac{1}{2} \times 14$ inches, $11 \times 17$ inches, or up to $30 \times 30$ inches. For 30 x 30 inch maps, one extra copy is required. $\boxtimes$ A north arrow, a legend, and scale. $\boxtimes$ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department. $\boxtimes$ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines. M Tax lot boundaries (property lines) are required. Tax lot numbers are recommended. $\boxtimes$ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads. M Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches. M Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged. $\boxtimes$ Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. $\boxtimes$ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.

If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example  $-42^{\circ}32^{\circ}15.5^{\circ}$ ) or degrees-decimal with five or more digits after the decimal (example  $-42.53764^{\circ}$ ).

\*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:

a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs  $\div$ 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

#### For Place of Use or Character of Use Changes

	there other water right certificates, water use permits or ground water registrations associated h the "from" or the "to" lands? 🛛 Yes 🗌 No
If	YES, list the certificate, water use permit, or ground water registration numbers: 4987.
a p	rsuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to brimary right proposed for transfer must be included in the transfer or be cancelled. Any change a ground water registration must be filed separately in a ground water registration modification blication.
For S	Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)
	ound water supplemental Permit or Certificate # NA; face water primary Certificate # NA.
For	a change from Supplemental Irrigation Use to Primary Irrigation Use
Ide	ntify the primary certificate to be cancelled. Certificate # <u>NA</u>
For	a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:
	Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.  Tip: You may search for well logs on the Department's web page at: <a href="http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx">http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx</a>
AN	ND/OR
	Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For <i>proposed wells not yet constructed or built</i> , provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.
Any w accompapplication well(s)	cell(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the panying application map. Failure to provide the information will delay the processing of your transfer ation until it is received. The information is necessary for the department to assess whether the proposed will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is itted by law from approving POA changes that do not access the same source aquifer.
