

Explain in your own words what you propose to accomplish with this transfer application, and why:

In 1987, we installed a gravity flow mainline to better manage water distribution of lands adjudicated out of Tucker Creek. Lands we propose to transfer are at the top end of the gravity flow mainline with inadequate pressure to efficiently irrigate these lands. We are proposing to transfer these water rights to land lower down the mainline where there is more adequate pressure to irrigate more efficiently.

SALEM, OR

Check the following boxes that apply:

- The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.
- The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.
- Both the receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.

At this time, are the lands in this transfer application in the process of being sold? Yes No

If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. For more information see: <http://www.oregon.gov/owrd/docs/transfer-propertytransactions.pdf>

RECEIVING LANDOWNER NAME Lowry Family Trust		PHONE NO. 541-523-3038	ADDITIONAL CONTACT NO. 541-518-3038
ADDRESS 24428 Keating Grange Ln.			FAX NO.

Certificate # 87531

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use:

We are currently diverting water out of Tucker Creek into a gravity flow mainline at "Additional POD" below "Hulick #1 POD". The pipeline starts at 12" for about 40', drops to 10" for about 1320', drops to 8" for about 5280' and to 6" for about 2640'. Currently we have about 10# of pressure on lands at the top of the pipeline and by transferring the water rights off of these lands to lands lower down we increase the pressure starting at 25# going as high as 75# at the end of the pipeline giving us better management of the water.

Distribution of the water is applied by sprinklers.
