Explain in your own words what you propose to accomplish with this transfer application, and why: Under Certificate 54875, the place of use covered acres on both sides of the railroad. When we bought our property (TL 052W22 00700) we acquired only the portion of this right on the east side of the railroad. The well to Certificate 54875 remained on the west side of the property, to which we do not have direct access.

Under Certificate 85895, the place of use covered acres on several tax lots. We also own a portion of land under this right (TL 052W22 00201); however, the wells to Certificate 85895 are located on different tax lots to which we do not have access.

We would like to drill two new wells on our property to cover the property we own.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Description of Water Delivery System											
System	System capacity: 0.86 cubic feet per second (cfs) OR										
	gallons per minute (gpm)										
Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. The water is pumped from the well using a 40 Hp submersible pump at 350 to 400 gpm and conveyed through a 6-inch buried PVC heading east from the well under the railroad extending to the eastern edge of the property. Along the mainlines are several hydrants evenly spaced where 4-inch aluminum hand lines are attached. Water is then slowly released flooding the area to irrigate the place of use. Table 1. >	Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

	Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For <i>proposed wells not yet constructed or built</i> , provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
