# Part 2 of 5 - Temporary Transfer Application Map Checklist

# Your temporary transfer application <u>will be returned</u> if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

	N/A	If more than three water rights are involved, separate maps are needed for each water right.
$\boxtimes$		Permanent quality printed with dark ink on good quality paper.
$\boxtimes$		The size of the map can be $8\frac{1}{2}$ x 11 inches, $8\frac{1}{2}$ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
$\boxtimes$		A north arrow, a legend, and scale.
$\boxtimes$		The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
$\boxtimes$		Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
$\boxtimes$		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
$\boxtimes$		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
$\boxtimes$		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
		Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
$\boxtimes$	□ N/A	Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
	N/A N/A	If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit of the desired who desired when the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

## Part 3 of 5 - Fee Worksheet

	in Berthaman C. F. Reimanner in Kraussen Michael and San			
1	Base Fee (includes temporary change to one water right for up to 1 cfs)	1	\$700.00	
İ	Number of water rights included in transfer 3 (2a)

6	Add entries on lines 1 through 5 above » » » » » » » » » Subtotal:	6	1175.20	
	Is this transfer:			
	necessary to complete a project funded by the Oregon Watershed			
	Enhancement Board (OWEB) under ORS 541.932?			
	endorsed in writing by ODFW as a change that will result in a net benefit to			
	fish and wildlife habitat?			
	If one or more boxes is checked, multiply line 6 by 0.5 and enter on line 7 »			
7	If no box is applicable, enter 0 on line 7» » » » » » » » » » » » » »	7	0.00	
8	Subtract line 7 from line 6 » » » » » » » » » » » » » Transfer Fee:	8	\$1175.20	

1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00
	Enter the cfs for the portions of the rights to be transferred (see example below*):		
	(2a)		
	Subtract 1.0 from the number in 2a above: (2b)		
	If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » »		
	If 2b is greater than 0, round up to the nearest whole number: (2c) and		
2	multiply 2c by \$50, then enter on line 2 » » » » » » » »	2	
3	Add entries on lines 1 through 2 above » » » » » » » Transfer Fee::	3	NA

<sup>\*</sup>Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

<sup>1.</sup> Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs  $\div$ 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

<sup>2.</sup> If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

<sup>3.</sup> Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

## Part 4 of 5 - Applicant Information and Signature

Explain in your own words what you propose to accomplish with this transfer application; and why: We are temporarily transferring water rights to area of circles that were identified not to have any water rights. The acres that are proposed to be transferred with this application are areas of solid set outside of the areas irrigated by circles.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Check this box if this project is fully or partially funded by the American Recovery and	d
Reinvestment Act. (Federal stimulus dollars)

#### **Description of Water Delivery System**

System capacity: 18.0 cubic feet per second (cfs) OR 8080 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. The distribution system consists of a river pumping station located on the south bank of the Columbia River. There are three river pumps, 1-250 hp, 1-500 hp, and 1-900 hp pump. From the river pumping station water is pumped southerly approximately 6100 feet through a 24" penstock to the northeasterly boundary line of the farm. From this point the buried main pipe distribution system continues in a southwesterly direction approximately 14,000 feet. Mainline pipe sizes vary from 24" to 12". There are 10", 8", 6", and 4" buried lateral (branch) pipelines. The lateral pipelines are connected to the main distribution pipeline. They deliver water to circle irrigation machines and irregular shaped parcels between circles. The irregular shaped parcels are irrigated with hand line.

Temporary Transfer Application - Page 7 of 14

**TACS** 

JUN 1 2 2014

## For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands?  $\boxtimes$  Yes  $\square$  No

If YES, list the certificate, water use permit, or ground water registration numbers:

#### **Permit G-16102**

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

	change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if sary to convey the water to the new temporary place of use:
	Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. ( <b>Tip</b> : You may search for well logs on the Department's web page at: <a href="http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx">http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx</a> )
ANI	D/OR
	Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For <i>proposed wells not yet constructed or built</i> , provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

## Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

				014/01	

RECEIVED BY OWRD

JUN 1 2 2014

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

#### **Description of Water Delivery System**

System capacity: 18.0 cubic feet per second (cfs) OR 8080 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. The distribution system consists of a river pumping station located on the south bank of the Columbia River. There are three river pumps, 1-250 hp, 1-500 hp, and 1-900 hp pump. From the river pumping station water is pumped southerly approximately 6100 feet through a 24" penstock to the northeasterly boundary line of the farm. From this point the buried main pipe distribution system continues in a southwesterly direction approximately 14,000 feet. Mainline pipe sizes vary from 24" to 12". There are 10", 8", 6", and 4" buried lateral (branch) pipelines. The lateral pipelines are connected to the main distribution pipeline. They deliver water to circle irrigation machines and irregular shaped parcels between circles. The irregular shaped parcels are irrigated with hand line.

Revised 7/1/2013 Temporary Transfer Application – Page 10 of 14

**TACS** 

RECEIVED BY OWRD

JUN 1 2 2014

## For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? 

Yes 
No

If YES, list the certificate, water use permit, or ground water registration numbers:

#### Permit G-16102

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

	change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if ary to convey the water to the new temporary place of use:
	Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. ( <b>Tip</b> : You may search for well logs on the Department's web page at: <a href="http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx">http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx</a> )
ANI	D/OR
	Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For <i>proposed wells not yet constructed or built</i> , provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

JUN 12 2014

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

## **Description of Water Delivery System**

System capacity: <u>5.0</u> cubic feet per second (cfs) **OR** <u>2240</u> gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. This distribution system consists of two 1000 ft drain tile lines and a small collection pond. A 20 hp turbine pump pumps water from the collection pond into a mainline pipe system with sizes that vary from 24" to 12" in diameter. There are 10", 8", 6", and 4" buried lateral (branch) pipelines. The lateral pipelines are connected to the main distribution pipeline. They deliver water to circle irrigation machines and irregular shaped parcels between circles. The irregular shaped parcels are irrigated with hand lines. The well authorized in the permit has not been drilled.

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)

(Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

Revised 7/1/2013

Temporary Transfer Application - Page 13 of 14

**TACS** 

RECEIVED BY OWRD

JUN 1 2 2014

#### For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? $\boxtimes$ Yes $\square$ No
If YES, list the certificate, water use permit, or ground water registration numbers:
Certificates 80773 and 85285
Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

to cancellation for nonuse under ORS 540-610.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if necessary to convey the water to the new temporary place of use:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: <a href="http://apps.wrd.state.or.us/apps/gw/well\_log/Default.aspx">http://apps.wrd.state.or.us/apps/gw/well\_log/Default.aspx</a>)

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

## Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
